    - Allows G-Invoicing to apply conditional logic to govern documents
  - Feature Management to control Account access to post-mandate functionality
    - Software development tool that will be leveraged to control usage of new features
    - G-Invoicing must control how new features are released - not all agencies will be ready to use a new feature at the same time.
  - Projected Release: June/July 2022

# Business Application (BizApp)

---

- BizApp will be a new data element on the GT&C Header Detail tab
  - Definition: A particular product line or type of operation, typically documented on an agreement between two business partners, and used to control attributes of that agreement and/or characterize transactions occurring under that agreement
- Allows G-Invoicing to apply conditional logic to govern documents
  - BizApp Conditions are not negotiable on each GT&C
  - Allows for *new data* to be introduced without continually changing the GT&C
  - Example conditions for BizApp 'EZ-10k'
    - Order Originating Partner Indicator must be Servicing
    - Advance Payment Indicator must be No
    - Reject Days = 30 *new data*
      - Reject Days is an attribute of BizApp 'EZ-10k' (i.e., not stored on GT&C)
  - Example conditions for BizApp 'COA' (constructive order acceptance)
    - Order Originating Partner Indicator must be Servicing
    - COA Days = 7 *new data*
      - COA Days is an attribute of BizApp 'COA' (i.e., not stored on GT&C)

# Feature Management

---

- BizApp choices will be limited by Feature Management
  - Example 1: BizApp ‘GSA Fleet Leasing’ is not yet supported by G-Invoicing
  - Example 2: Agency XYZ not ready to use BizApp ‘EZ 10k’
- Not all agencies will be ready to use a new feature at the same time
  - G-Invoicing users may have immediate access to new features
  - ERP vendors release new features on their own cadence
  - Agencies upgrade software on their own schedule
  - Most documents involve two partnering agencies
- Feature Management controls when/how new functionality is used
  1. Treasury will release a new application feature
  2. Agencies will declare their readiness to use that feature
  3. G-Invoicing will ensure both partners are ready to use a feature
  4. Treasury may set a deadline for when all agencies must use a feature

# Manage Feature Flags

- Master Administrators will set Feature Flags to declare readiness
- Flags will initially be controlled at Agency Account level by “side”
- Survey question asks if Feature Flags should be controlled by Org Group (and descendants)

The screenshot shows the G-Invoicing Administration interface. The top navigation bar includes 'Home', 'Requesting Agency', 'Servicing Agency', and 'Administration'. The user is logged in as 'Bill Schmidt Agency'. The main content area is titled 'Agency Features' and shows the 'Partner Indicator' set to 'Requesting Agency'. - Once the partnership has been established, available BizApps appear in a drop-down list on Header/Detail tab

The screenshot displays the 'Header Detail' configuration page for a BizApp. The interface includes a top navigation bar with 'Home', 'Requesting Agency', 'Servicing Agency', 'Administration', and 'Reports' menus.
