What’s Next

• Development underway for Release 4.5.
  – In-Flight Order Upload (Order Validations)
  – Business Application (BizApp) added to the GT&C
    • New data element on the GT&C Header Detail tab
    • Allows G-Invoicing to apply conditional logic to govern documents
  – Feature Management to control Account access to post-mandate functionality
    • Software development tool that will be leveraged to control usage of new features
    • G-Invoicing must control how new features are released - not all agencies will be ready to use a new feature at the same time.
  – Projected Release: June/July 2022
Business Application (BizApp)

• BizApp will be a new data element on the GT&C Header Detail tab
  – Definition: A particular product line or type of operation, typically documented on an agreement between two business partners, and used to control attributes of that agreement and/or characterize transactions occurring under that agreement

• Allows G-Invoicing to apply conditional logic to govern documents
  – BizApp Conditions are not negotiable on each GT&C
  – Allows for new data to be introduced without continually changing the GT&C
  – Example conditions for BizApp ‘EZ-10k’
    • Order Originating Partner Indicator must be Servicing
    • Advance Payment Indicator must be No
    • Reject Days = 30
      – Reject Days is an attribute of BizApp ‘EZ-10k’ (i.e., not stored on GT&C)
  – Example conditions for BizApp ‘COA’ (constructive order acceptance)
    • Order Originating Partner Indicator must be Servicing
    • COA Days = 7
      – COA Days is an attribute of BizApp ‘COA’ (i.e., not stored on GT&C)
Feature Management

- BizApp choices will be limited by Feature Management
  - Example 1: BizApp ‘GSA Fleet Leasing’ is not yet supported by G-Invoicing
  - Example 2: Agency XYZ not ready to use BizApp ‘EZ 10k’

- Not all agencies will be ready to use a new feature at the same time
  - G-Invoicing users may have immediate access to new features
  - ERP vendors release new features on their own cadence
  - Agencies upgrade software on their own schedule
  - Most documents involve two partnering agencies

- Feature Management controls when/how new functionality is used
  1. Treasury will release a new application feature
  2. Agencies will declare their readiness to use that feature
  3. G-Invoicing will ensure both partners are ready to use a feature
  4. Treasury may set a deadline for when all agencies must use a feature
Manage Feature Flags

- Master Administrators will set Feature Flags to declare readiness
- Flags will initially be controlled at Agency Account level by “side”
- Survey question asks if Feature Flags should be controlled by Org Group (and descendants)
BizApp on the GT&C

- GT&C Manager will choose a partnering agency, Org Groups, and ALCs as they do today
- Once the partnership has been established, available BizApps appear in a drop-down list on Header/Detail tab
- Once selected, any BizApp conditions will be applied to that GT&C
Additional releases will be added as planning occurs for future Program Increments. The following link can be used to reference the Services Quick Reference Guide for additional information regarding the versions of Application Program Interface (API), XML, specifications, Federal Intragovernmental Data Standards (FIDS) and System Mapping & Validation Rules (SM&VR) supported by each release.

• Defined the Monitoring and Enforcement metrics for G-Invoicing Mandate Compliance.  
  https://tfm.fiscal.treasury.gov/content/tfm/v1/bull/22-03.html

• Ranges are based on the dollar amount of Buy/Sell activity in G-Invoicing as compared to 
  the FR Entities’ GTAS data and will increase each fiscal year.

---

**Metric: Comparison of an FR Entity's transactions in G-Invoicing against that FR Entity's IGT Buy/Sell, Balances in GTAS.**
