TREASURY BULLETIN

The Treasury Bulletin is for sale
by the Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402.

The Treasury Bulletin is issued quarterly in March, June, September, and December by the Financial Management Service, Governmentwide Accounting, Budget Reports Division. Statistical data is compiled from sources within Treasury departmental offices and bureaus, as well as various other Federal program agencies. Readers can contact the publication staff at (202) 874-9938/9939 to inquire about any of the published information. Suggestions are welcome.

The publication staff can also be reached by electronic mail.

Profile of the Economy

[Source: Office of Macroeconomic Analysis]
As of May 17, 2011

Introduction

Although the pace of expansion slowed in the first quarter, the recovery remains on a firm footing, with healthy growth in consumer spending and strong investment in business equipment and software. Over the past 14 months, the economy has added a total of 1.8 million payroll jobs, and the unemployment rate has been trending lower. Nevertheless, the unemployment rate is still high at 9 percent and the housing sector remains weak, with home prices still declining.

The recent run-up in oil prices is a concern for inflation as well as for private consumption. While inflation has edged up slightly, it remains in check. In financial markets, equity indexes have rallied, on balance, thus far in 2011, and Treasury bond yields have trended lower in recent weeks.

Financial disbursements under the American Recovery and Reinvestment Act of 2009 (ARRA, or the “Recovery Act”) will be completed this year, but additional measures to restore financial stability and improve housing markets remain in place, including the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (2010 Tax Relief Act). This Act, passed last December, included a 2 percent payroll tax cut and is designed to sustain the upward momentum of the recovery.

Pursuing its statutory mandate to foster maximum employment and price stability, the Federal Reserve continues to bolster liquidity by maintaining holdings of securities at current levels and rolling over holdings of Treasury securities as they mature. In April 2011, the Federal Reserve announced its intention to complete purchases of longer-term Treasury securities by the end of the second quarter of 2011.

Economic Growth

Since the current expansion began in mid-2009, the economy has grown by 4.9 percent. According to the advance estimate, real gross domestic product (GDP) growth moderated from a 3.1 percent annual rate in the final quarter of 2010 to a 1.8 percent annual rate in the first quarter of 2011—the seventh straight quarter of growth since the economy emerged from recession in mid-2009. The slowdown was driven in part by temporary factors, including severe winter weather early in the quarter that curtailed construction spending, a drop in government purchases, a deceleration in consumer spending, and an increase in imports. These developments were partly offset by the change in private inventories, which boosted GDP growth in the first quarter.

Growth of Real GDP

(Quarterly percent change at annual rate)

Private domestic final demand (consumption plus private fixed investment, considered a better measure of underlying demand because it subtracts out inventory movements) grew by 2.4 percent, slowing from the fourth quarter’s 4.4 percent rise. Still, the ongoing strength of this measure over the past five quarters indicates that private demand remains solid, and the recovery is not dependent on government stimulus.

While the steep run-up in gas prices during the first few months of 2011 likely cut into consumer spending, real personal consumption expenditures—which account for about 70 percent of GDP—grew 2.7 percent at an annual rate in the first quarter. After declining by 0.3 percent in 2008, and by 1.2 percent in 2009, consumer spending has expanded for seven straight quarters, and in the first quarter of 2011, contributed 1.9 percentage points to real GDP growth.

Residential investment—mostly residential homebuilding—declined 4.1 percent in the first quarter, after rising 3.3 percent in the fourth quarter, and is now at a 28-year low. The decline in residential activity shaved less than 0.1 percentage point off of real GDP growth. Housing markets have remained weak thus far in 2011, weighed down by a number of factors, including uncertainty about future home price values and the high level of unemployment. Single family housing starts fell 5.1 percent in April to 394,000 units (annualized), nearly 12 percent above the early 2009 low but still 78 percent below the January 2006 peak. Home sales are still below April 2010 levels, which were boosted by a rush to beat the April 30 expiration of the home buyer tax credit. New single-family home sales increased 11.1 percent in March to 300,000 (annualized) but were still 78 percent below the July 2005 peak. Existing single-family home sales rose 3.7 percent in March to 5.1 million units

(annualized), but were still 30 percent below the September 2005 peak. Inventories of unsold new single family homes stood at their lowest level in 43 years, but relative to sales remained very high at a 7.3-month supply in March. Inventories of existing single-family homes stood at an 8.4-month supply in March. Home prices have been declining again, but at a slower pace than during the recession. The Federal Housing Financing Authority (FHFA) purchase-only house price index fell 1.6 percent in February and was down 5.7 percent compared to a year earlier. The Standard & Poor's (S&P)/Case-Shiller composite home price indexes fell for the 7th-straight month in February on a monthly basis: the 20-city and 10-city indexes both declined 1.1 percent. On a 12-month basis through February 2011, the 20-city index declined 3.3 percent although the 10-city index was 0.7 percent higher.

Nonresidential fixed investment—about 10 percent of GDP—advanced 1.8 percent at an annual rate in the first quarter of 2011, slowing markedly from an annual rate of 7.7 percent in the fourth quarter (and double-digit surges in each of the two quarters prior to that). For the fourth of the past five quarters, business spending on equipment and software grew at a double-digit pace, rising 11.6 percent in the first quarter—the eighth-straight quarter of growth. However, after rising for the first time in 2 years in the fourth quarter, outlays for structures sharply fell in the first quarter of 2011, by 21.7 percent, to its lowest level since 1978. Altogether, nonresidential fixed investment contributed 0.2 percentage point to real GDP growth in the first quarter. Inventory accumulation rose at a faster pace, boosting growth by an additional 0.9 percentage point.

Exports account for about 12 percent of GDP, while imports, which are subtracted from total domestic spending to calculate GDP, account for about 17 percent. In each of the 3 years prior to 2010, the net export deficit (exports less imports) narrowed, reflecting weak demand for imports that exceeded softer foreign demand for U.S. goods and services. The improvement in the net export deficit contributed 1 percentage point on average to quarterly real GDP growth during this period. In 2010, this trend reversed, and net exports posed a significant drag on growth in the first three quarters of the year. Although the trade deficit narrowed substantially in last year's fourth quarter, the previous trend resumed in the first quarter of 2011, as export growth slowed to 4.9 percent and imports increased by 4.4 percent. As a result, net exports subtracted 0.1 percentage point from real GDP growth—a dramatic shift from the fourth quarter, when net exports added 3.3 percentage points to growth.

The current account balance (reflecting international trade in goods and services, investment income flows, and unilateral transfers) has been in deficit almost continuously since the early 1980s, and in 2006, reached a record \$803 billion, equivalent to 6.0 percent of GDP. By 2009, the current account deficit had narrowed to \$378 billion (2.7 percent of GDP), as the trade deficit narrowed, but it

widened in 2010 to \$470 billion (3.2 percent of GDP) as the U.S. economy recovered.

Government purchases—which account for roughly 20 percent of GDP—fell 5.2 percent at an annual rate in the first quarter, subtracting 1.1 percentage points from real GDP growth. Federal spending fell 7.9 percent (led by an 11.7 percent plunge in national defense spending) and State and local government expenditures fell 3.3 percent.

Labor Markets

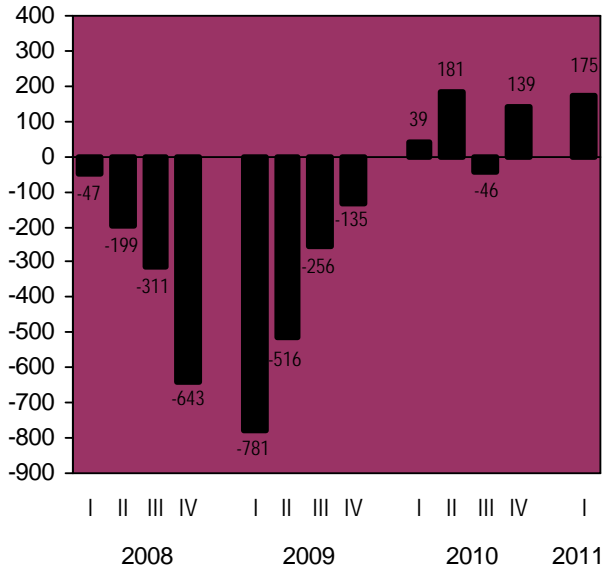

During the recession (from December 2007 through June 2009), the economy lost 7.8 million private-sector jobs. Job losses continued even after the recovery began, with payrolls resuming growth in March 2010. Total employment has grown by 1.8 million over the past 14 months, and private-sector payrolls have consistently grown over that period, adding 2.1 million new payroll jobs.

Job losses during the recession were spread broadly across most sectors but with the resumption of job growth, many of these sectors have added jobs. Since the labor market recovery began in early 2010, payrolls in professional and business services have risen by 584,000, and leisure and hospitality industries' employment has increased by 290,000. A few sectors continued to add jobs throughout the recession and now well beyond it: since early 2010, the health care and education sectors have together added more than 514,000 million payroll jobs, including a gain of more than 426,000 jobs in health services. Notably, since reaching an early trough in December 2009, manufacturing payrolls have grown by 250,000. On the other hand, the government sector, especially at the local level, has lost more jobs in subsequent months than during the 19 months of the recession. Local government payrolls fell by 91,000 between December 2007 and June 2009, but since then they have fallen by 370,000.

The unemployment rate peaked at 10.1 percent in October 2009—a 26-year high and 5.7 percentage points above the March 2007 low of 4.4 percent. The unemployment rate has since declined, reaching 8.8 percent in March 2011 before edging back up to 9.0 percent in April 2011. A broader measure of unemployment that includes workers who are underemployed and those who are only marginally attached to the labor force reached a record high of 17.4 percent in October 2009 (series dates from 1994)—nearly double its level of 8.8 percent in December 2007. This measure fell to 16.5 percent in June 2010 and then trended higher again, reaching 17.1 percent in September 2010 before falling to 15.9 percent in April 2011. The percentage of the unemployed who have been out of work for 27 weeks or more peaked at an all-time high of 45.6 percent in May 2010, then edged down in subsequent months before climbing again to reach 45.5 percent in March 2011. As of April 2011, it had declined to 43.4 percent.

Payroll Employment

(Average monthly change in thousands from end of quarter to end of quarter)

Unemployment Rate

(Percent)

Inflation

Despite rising commodity prices, inflation remains relatively low. Factors including the high level of unemployment and the low level of capacity utilization continue to restrain underlying price pressures. Headline consumer prices rose 3.2 percent over the 12 months ending in April, accelerating from the previous year’s 2.2 percent increase. Energy prices rose 19.0 percent in the year through April, roughly in line with the year-earlier, 18.5 percent increase. On a 12-month basis core consumer prices (excluding food and energy) rose 1.3 percent through April 2011, compared with a 0.9 percent advance a year ago. Measures for the most recent 3 months underscore that commodity price pressures are not having a significant impact on core consumer prices. Although headline consumer inflation rose to 6.5 percent at an annual rate over the 3 months ended in April (with energy prices rising more than 46 percent over the same period), core consumer inflation was just 2.6 percent at an annual rate during the same period.

Energy prices have sharply risen over the past several months but are still below summer 2008 peaks. The front-month futures price for West Texas Intermediate (WTI) crude oil rose to a record \$147 per barrel in July 2008; it averaged \$110 per barrel in April 2011 and has averaged \$104 per barrel thus far in May. The retail price of regular gasoline was \$3.97 per gallon in the week ended May 9, 2011, up \$1.06 from a year ago, but still below July 2008’s record \$4.11 per gallon.

Food prices have been rising noticeably in the past several months. In the year through April 2011, consumer food prices increased 3.2 percent, much faster than the 0.5 percent rise of the previous year. For the 3 months ending in April 2011, food prices were 4.4 percent higher at an annual rate.

Consumer Prices

(Percent change from a year earlier)

Federal Budget

The federal budget deficit narrowed to \$1.3 trillion (8.9 percent of GDP) in fiscal year 2010, from \$1.4 trillion in fiscal year 2009 (10.0 percent of GDP), but is expected to widen to 10.9 percent of GDP in fiscal year 2011, in part because of the December 2010 tax cut agreement. Nonetheless, the Administration's Fiscal Year 2012 Budget projects a significant narrowing of the deficit over the next few years, as the economy recovers and provisions of the Recovery Act and the December 2010 tax legislation expire. By fiscal year 2013, the deficit is expected to fall by half to 4.6 percent of GDP. Over the longer term (fiscal years 2016 to 2021), the deficit is projected to average 3.1 percent of GDP. About 80 percent of the overall deficit in the long term is due to interest payments; the primary deficit (receipts less spending excluding interest payments) is forecast to fall from 7.6 percent of GDP in fiscal year 2010 to 0.4 percent in fiscal year 2016, then shift to rough balance in fiscal year 2017 and to a small surplus of about 0.3 percent of GDP from fiscal years 2018 to 2021.

Economic Policy

Key fiscal and monetary policy actions taken over the past few years have aided the recovery. On the fiscal policy side, the ARRA authorized the Federal Government to spend \$787 billion to stimulate domestic demand. As of mid-May 2011, about \$650 billion in funds had been paid out, and all disbursements will be completed later this year. This spending has provided an important boost to economic activity in recent years. The Council of Economic Advisers estimates that as of the fourth quarter of 2010, the Recovery Act raised employment relative to what it otherwise would have been by between 2.5 and 3.6 million.

Late in 2009, the first-time home buyer tax credit was temporarily extended and expanded to include all home buyers (it expired on April 30, 2010), and a new Small Business Jobs and Wages Tax Credit was announced to help small businesses create jobs. In August 2010, the Government approved legislation providing an additional \$26 billion for State and local Governments to support jobs and medical services. Finally, in December 2010, the 2010 Tax Relief Act authorized a 2 percent payroll tax cut, an extension of unemployment benefits, extensions of refundable tax credits, and a 2-year extension of the 2001 tax cuts.

In mid-April, building on the policies of the fiscal year 2012 budget, the President announced a Fiscal Framework to reduce the budget deficit by an additional \$4 trillion over the next 12 years and to put the national debt on a declining path by the second half the current decade. Deficit reduction under this framework will be phased in over time, so as to protect and strengthen the economic recovery. (The Administration has not yet released updated projections of future budget deficits that incorporate measures of the proposed Fiscal Framework.)

Partly in response to rising financial market stress, as well as to signs of more slowing in the broader economy, the Federal Reserve began easing monetary policy in August 2007. By late 2008, the Federal Open Market Committee (FOMC) had lowered the federal funds target interest rate dramatically, reducing it to a historically low target range of 0 percent to 0.25 percent at the December 2008 FOMC meeting. That target range was maintained at the FOMC's most recent meeting in late April 2011. At the same time, the Committee acknowledged the softer tone of recent data on growth but was more definitively positive about improvements in the labor market than in the statement accompanying the March FOMC meeting. In addition to lowering the federal funds rate target, in late 2008, the Federal Reserve significantly expanded its tools to increase liquidity in credit markets and eased lending terms to sectors in need of liquidity, including a variety of facilities and funds directed at specific financial markets. As of June 30, 2010, all of these special facilities had expired. At the August 2010 FOMC meeting, the Federal Reserve announced it would maintain its holdings of securities at current levels by reinvesting principal payments from agency debt and agency mortgage-backed securities in longer-term Treasury securities and to continue rolling over the Federal Reserve's holdings of Treasury securities as they mature. At its most recent meeting in April, the FOMC definitely signaled that it will complete purchases of \$600 billion of longer-term Treasury securities by the end of the current quarter (i.e., end-June 2011).

Financial Markets

Financial markets have largely recovered from the unprecedented strains experienced in the fall of 2008. Credit flows have been improving substantially since early 2009. Bank lending has been picking up, with further easing of standards and terms, and loan demand has stabilized or improved, depending upon market segment. Measures of risk tolerance and volatility have largely returned to pre-crisis levels.

After plunging 38.5 percent in 2008, the sharpest loss since 1931 (when an earlier version of the index, containing only 90 stocks, dropped 47 percent), the S&P 500 index rose 23.5 percent in 2009 and 12.8 percent in 2010. Measured from the S&P 500's 12-year low in mid-March 2009, the index has risen about 97 percent through mid-May, and thus far in 2011, is about 6 percent higher. The S&P Stock Market Volatility Index (VIX), often used as a measure of financial market uncertainty, surged to an all-time high of 80 percent in late October 2008, after hovering in a range of 20 to 30 percent for most of that year. The VIX retreated fairly steadily during 2009, ending that year at about 20 percent, but fluctuated more widely last year, resurging to a recent peak of nearly 46 percent in mid-May 2010. Since then, it has declined more steadily, to about 17 percent in mid-May 2011.

Long-Term Interest Rate Spreads

Short-Term Interest Rate Spreads

A variety of factors have buffeted long-term Treasury interest rates, including flight-to-quality flows in response to a variety of specific risk events as well as supply concerns related to funding of the government’s debt. The yield on the 10-year note reached a low of 2.1 percent in late December 2008, but then moved higher, closing in early April 2010 above the 4 percent mark for the first time since October 2008. For the remainder of last year, the yield fell, reaching a recent low of 2.41 percent in early October before resuming an upward climb to 3.75 percent as of February 2011. Since then the yield trended lower, dipping below 3.2 percent as of mid-May 2011, roughly 110 basis points above the December 2008 low. The 3-month Treasury bill yield, by contrast, generally trended lower throughout 2008 under the relatively steady influence of safe-haven demand for short-term liquid assets. The yield almost fell to zero—a record low—by the end of December 2008, then fluctuated in a range of 0.0 to 0.2 percent throughout 2009. Last year, the yield moved in a narrow range of 0.05 to 0.2 percent, fluctuating at the upper end of this range through late February 2011. Since then, the yield has moved lower, reaching 0.02 percent as of mid-May 2011. The 2- to 10-year Treasury yield spread, one measure of the steepness of the yield curve, widened (steepened) noticeably starting in mid-2007, when it was roughly 20 basis points, to 290 basis points in mid-January 2010, then narrowed during the rest of last year, reaching about 200 basis points last October. After that, the spread widened, reaching 291 basis points as of early February 2011 before narrowing somewhat to 265 basis points as of mid-May 2011. In the current economic

environment, a generally steepening yield curve may suggest a rising probability of economic recovery.

Key interest rates on private securities, which spiked in response to financial market turbulence in late 2008, have since retraced as conditions have stabilized. The spread between the 3-month London Inter-bank Offered Rate (LIBOR) and the 3-month Treasury bill rate (the TED spread, a measure of inter-bank liquidity and credit risk) rose to an all-time high of nearly 460 basis points in early October 2008. However, improvements in short-term credit availability led to a narrowing of this spread to 9 basis points in March 2010. Through mid-June 2010, the spread widened again to nearly 50 basis points, then narrowed to a recent low of 12 basis points in late November 2010. As of mid-May 2011, the spread was about 17 basis points. The spread between the Baa corporate bond yield and the 10-year Treasury yield peaked at nearly 620 basis points in December 2008. After narrowing in 2009 and early 2010, the spread widened again to a recent peak of 331 basis points in mid-November 2010. However, since late last year, the spread has consistently remained below 300 basis points, falling to 265 basis points in mid-May 2011, though still very high by historical standards.

Rates for conforming mortgages have trended lower in recent years, as have rates for jumbo mortgages. The interest rate for a 30-year conforming fixed-rate mortgage fell to a record low of 4.17 percent in early November 2010, then climbed to a recent high of nearly 5.2 percent in mid-February 2011. Since then, the rate has declined, reaching 4.7 percent as of mid-May 2011.

Foreign Exchange Rates

Although the value of the U.S. dollar compared with the currencies of seven major trading partners (the euro area countries, Japan, Canada, the United Kingdom, Australia, Sweden, and Switzerland) had begun to stabilize after depreciating significantly from its February 2002 peak, it has resumed a depreciating trend. For example, between February 2002 and January 2009, the exchange value of the dollar compared to an index of these currencies fell by about 16 percent over the timeframe, but between October 2007 and October 2009, the dollar appreciated by roughly 1.0

percent against this index. Over the past 2 years, however, the dollar has depreciated by 15 percent against this index. Over the longer timeframe, the dollar depreciated by about 33 percent against the yen, and by 34 percent against the euro. Over the past 2 years, the dollar has depreciated by about 15 percent against the yen and by 10 percent against the euro. Against an index of currencies of 19 other important trading partners (including China, India, and Mexico), the dollar appreciated by about 1 percent over the longer timeframe, but over the past 2 years, the dollar has depreciated by about 13 percent against this basket.

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.

- Table **FFO-5** summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

- Table **FFO-6** includes customs collection of duties, taxes, and fees by districts and ports.

Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal year 2011 supplements fiscal data reported in the March issue of the “Treasury Bulletin.” At the time of that issue’s release, not enough data were available to adequately analyze collections for the quarter.

Individual income taxes—Individual income tax receipts, net of refunds, were \$219.6 billion for the second quarter of fiscal year 2011. This is an increase of \$33.8 billion over the comparable prior year quarter. Withheld receipts increased by \$30.1 billion and non-withheld receipts increased by \$4.6 billion during this period. Refunds increased by \$0.9 billion over the comparable fiscal year 2010 quarter. There was a decrease of \$3.8 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal year 2010.

Corporate income taxes—Net corporate income tax receipts were \$19.1 billion for the second quarter of fiscal year 2011. This is a decrease of \$0.9 billion compared to the prior year second quarter. The \$0.9 billion change is

comprised of a decrease of \$16.7 billion in estimated and final payments, and a decrease of \$15.9 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the second quarter of fiscal year 2011 were \$190.8 billion, a decrease of \$16.0 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by -\$16.4 billion, -\$2.8 billion, and \$3.2 billion respectively. There was a -\$1.2 billion accounting adjustment of for prior years’ employment tax liabilities made in the second quarter of fiscal year 2011, while there was a -\$5.0 billion adjustment in the second quarter of fiscal year 2010.

Unemployment insurance—Unemployment insurance receipts, net of refunds, for the second quarter of fiscal year 2011 were \$6.9 billion, an increase of \$1.6 billion over the comparable quarter of fiscal year 2010. Net State taxes deposited in the U.S. Treasury increased by \$1.4 billion to \$5.5 billion. Net Federal Unemployment Tax Act taxes increased by \$0.2 billion to \$1.4 billion.

Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source, con.

Contributions for other insurance and retirement— Contributions for other retirement were \$0.9 billion for the second quarter of fiscal year 2011. This was a negligible change from the comparable quarter of fiscal year 2010.

Excise taxes—Net excise tax receipts for the second quarter of fiscal year 2011 were \$16.3 billion, an increase of \$3.0 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.8 billion, a decrease of \$2.9 billion over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were -\$0.5 billion for the second quarter of fiscal year 2011.

These receipts represent a decrease of \$5.9 billion over the same quarter in fiscal year 2010, mainly due to the expiration of the estate tax in 2010.

Customs duties—Customs duties net of refunds were \$6.7 billion for the second quarter of fiscal year 2011. This is an increase of \$1.0 billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the second quarter of fiscal year 2011 were \$28.2 billion, an increase of \$5.4 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks increasing by \$4.9 billion.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of the Treasury's (Treasury's) operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include FRBs, Treasury Regional Financial Centers, Internal Revenue Service Centers, Bureau of the Public Debt, and various electronic systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositories maintaining tax and loan accounts. Under the Treasury tax and loan (TT&L) investment program, depository financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax

and loan accounts in interest-bearing obligations can participate. The program permits Treasury to collect funds through financial institutions and to leave the funds in TT&L depositories and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on TT&L financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so as collector depositories.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments that the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ This report includes Supplementary Financing Program (SFP) balances.² Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.³ Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.⁴ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories as follows: withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970; and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the “Treasury Bulletin” reflect the total. Further detailed information is published in the “Monthly Statement of the Public Debt of the United States.” Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

Treasury’s Financial Management Service (FMS) compiles data in the “Treasury Bulletin” tables FD-2 and FD-6 from the “Monthly Statement of the Public Debt of the United States.”

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing

has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”)

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the “Monthly Statement of the Public Debt of the United States.” The information in this section of the “Treasury Bulletin” pertains only to marketable Treasury securities.

Table **PDO-1** presents the results of weekly auctions of 4-, 13-, and 26-week bills. Treasury bills mature each Thursday. Issues of 4- and 13-week bills are *reopenings* of 26-week bills. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive bases.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to \$5 million for bills and \$5 million for notes and bonds in each auction of securities.

Table **PDO-2** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Issues of *cash management* bills also are presented.

Note: Cash management bills identified below are issued as part of the Supplementary Financing Program (SFP). For more details about the SFP, visit www.treasury.gov/press/releases/hp1144.htm or call 202-622-2960.

Note: On February 4, 2009, Treasury announced the reintroduction of the 7-year note. The first auction of this security took place on February 26, 2009.

TREASURY FINANCING: JANUARY-MARCH

[Source: Bureau of the Public Debt, Office of Financing]

JANUARY

Cash Management Bills

On January 3, 2011, Treasury announced it would auction \$25,000 million of 56-day bills. They were issued January 6 and matured March 3. The issue was part of the SFP. Treasury auctioned the bills on January 5. Tenders totaled \$116,478 million; Treasury accepted \$25,001 million. The high bank discount rate was 0.140 percent.

On January 10, 2011, Treasury announced it would auction \$25,000 million of 56-day bills. They were issued January 13 and matured March 10. The issue was part of the SFP. Treasury auctioned the bills on January 12. Tenders totaled \$115,741 million; Treasury accepted \$25,000 million. The high bank discount rate was 0.155 percent.

On January 18, 2011, Treasury announced it would auction \$25,000 million of 56-day bills. They were issued January 20 and matured March 17. The issue was part of the SFP. Treasury auctioned the bills on January 19. Tenders totaled \$116,368 million; Treasury accepted \$25,001 million. The high bank discount rate was 0.160 percent.

On January 24, 2011, Treasury announced it would auction \$25,000 million of 56-day bills. They were issued January 27 and matured March 24. The issue was part of the SFP. Treasury auctioned the bills on January 26. Tenders totaled \$118,784 million; Treasury accepted \$25,002 million. The high bank discount rate was 0.160 percent.

52-Week Bills

On January 6, 2011, Treasury announced it would auction \$22,000 million of 364-day Treasury bills. They were issued January 13, and will mature January 12, 2012. The issue was to refund \$135,003 million of all maturing bills and pay down approximately \$6,003 million. Treasury auctioned the bills on January 11. Tenders totaled \$117,556 million; Treasury accepted \$22,000 million. That included \$198 million of noncompetitive tenders from the public. The high bank discount rate was 0.275 percent.

Auction of 3-Year Notes

On January 6, 2011, Treasury announced it would auction \$32,000 million of 3-year notes. The issue was to refund \$25,382 million of securities maturing January 15 and to raise new cash of approximately \$40,618 million.

The 3-year notes of Series V-2014 were dated January 15 and issued January 18. They are due January 15, 2014, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of 1 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon eastern time (e.t.) for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 11. Tenders totaled \$97,833 million; Treasury accepted \$32,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.027 percent with the equivalent price of \$99.920611. Treasury accepted in full all competitive tenders at yields lower than 1.027 percent. Tenders at the high yield were allotted 41.70 percent. The median yield was 0.983 percent, and the low yield was 0.928

TREASURY FINANCING: JANUARY-MARCH, con.

percent. Noncompetitive tenders totaled \$41 million. Competitive tenders accepted from private investors totaled \$31,959 million. Accrued interest of \$0.08287 per \$1,000 must be paid for the period from January 15 to January 18.

In addition to the \$32,000 million of tenders accepted in the auction process, Treasury accepted \$701 million from Federal Reserve banks (FRBs) for their own accounts. The minimum par amount required for Separate Trading of Registered Interest and Principal Securities (STRIPS) of notes of Series V-2014 is \$100.

Auction of 9-Year 10-Month 2-5/8 Percent Notes

On January 6, 2011, Treasury announced it would auction \$21,000 million of 9-year 10-month 2-5/8 percent notes. The issue was to refund \$25,382 million of securities maturing January 15 and to raise new cash of approximately \$40,618 million.

The 9-year 10-month notes of Series F-2020 were dated November 15, 2010, and issued January 18, 2011. They are due November 15, 2020, with interest payable on May 15 and November 15 until maturity.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 12. Tenders totaled \$69,368 million; Treasury accepted \$21,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.388 percent with an equivalent price of \$93.664061. Treasury accepted in full all competitive tenders at yields lower than 3.388 percent. Tenders at the high yield were allotted 38.50 percent. The median yield was 3.350 percent, and the low yield was 3.285 percent. Noncompetitive tenders totaled \$37 million. Competitive tenders accepted from private investors totaled \$20,963 million. Accrued interest of \$4.64088 per \$1,000 must be paid for the period from November 15 to January 18.

In addition to the \$21,000 million of tenders accepted in the auction process, Treasury accepted \$460 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series F-2020 is \$100.

Auction of 29-Year 10-Month 4-1/4 Percent Bonds

On January 6, 2011, Treasury announced it would auction \$13,000 million of 29-year 10-month 4-1/4 percent bonds. The issue was to refund \$25,382 million of securities maturing January 15 and to raise new cash of approximately \$40,618 million.

The 29-year 10-month bonds of November 2040 were dated November 15, 2010, and issued January 18, 2011. They are due November 15, 2040, with interest payable on May 15 and November 15 until maturity.

Treasury received tenders for the bonds before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 13. Tenders totaled

\$34,715 million; Treasury accepted \$13,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.515 percent with an equivalent price of \$95.669689. Treasury accepted in full all competitive tenders at yields lower than 4.515 percent. Tenders at the high yield were allotted 40.45 percent. The median yield was 4.429 percent, and the low yield was 4.150 percent. Noncompetitive tenders totaled \$12 million. Competitive tenders accepted from private investors totaled \$12,988 million. Accrued interest of \$7.51381 per \$1,000 must be paid for the period from November 15 to January 18.

In addition to the \$13,000 million of tenders accepted in the auction process, Treasury accepted \$285 million from FRBs for their own accounts. The minimum par amount required for STRIPS of bonds of November 2040 is \$100.

Auction of 2-Year Notes

On January 20, 2011, Treasury announced it would auction \$35,000 million of 2-year notes. The issue was to refund \$39,466 million of securities maturing January 31 and to raise new cash of approximately \$72,534 million.

The 2-year notes of Series AG-2013 were dated and issued January 31. They are due January 31, 2013, with interest payable on July 31 and January 31 until maturity. Treasury set an interest rate of 0-5/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 25. Tenders totaled \$121,361 million; Treasury accepted \$35,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 0.650 percent with an equivalent price of \$99.950404. Treasury accepted in full all competitive tenders at yields lower than 0.650 percent. Tenders at the high yield were allotted 26.64 percent. The median yield was 0.621 percent, and the low yield was 0.530 percent. Noncompetitive tenders totaled \$306 million. Competitive tenders accepted from private investors totaled \$34,694 million.

In addition to the \$35,000 million of tenders accepted in the auction process, Treasury accepted \$697 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series AG-2013 is \$100.

Auction of 5-Year Notes

On January 20, 2011, Treasury announced it would auction \$35,000 million of 5-year notes. The issue was to refund \$39,466 million of securities maturing January 31 and to raise new cash of approximately \$72,534 million.

The 5-year notes of Series T-2016 were dated and issued January 31. They are due January 31, 2016, with interest payable on July 31 and January 31 until maturity. Treasury set

TREASURY FINANCING: JANUARY-MARCH, con.

an interest rate of 2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 26. Tenders totaled \$103,938 million; Treasury accepted \$35,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.041 percent with an equivalent price of \$99.806052. Treasury accepted in full all competitive tenders at yields lower than 2.041 percent. Tenders at the high yield were allotted 29.85 percent. The median yield was 2.000 percent, and the low yield was 1.950 percent. Noncompetitive tenders totaled \$61 million. Competitive tenders accepted from private investors totaled \$34,939 million.

In addition to the \$35,000 million of tenders accepted in the auction process, Treasury accepted \$697 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series T-2016 is \$100.

Auction of 7-Year Notes

On January 20, 2011, Treasury announced it would auction \$29,000 million of 7-year notes. The issue was to refund \$39,466 million of securities maturing January 31 and to raise new cash of approximately \$72,534 million.

The 7-year notes of Series G-2018 were dated and issued January 31. They are due January 31, 2018, with interest payable on July 31 and January 31 until maturity. Treasury set an interest rate of 2-5/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 27. Tenders totaled \$82,622 million; Treasury accepted \$29,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.744 percent with an equivalent price of \$99.246792. Treasury accepted in full all competitive tenders at yields lower than 2.744 percent. Tenders at the high yield were allotted 95.59 percent. The median yield was 2.700 percent, and the low yield was 2.637 percent. Noncompetitive tenders totaled \$17 million. Competitive tenders accepted from private investors totaled \$28,983 million.

In addition to the \$29,000 million of tenders accepted in the auction process, Treasury accepted \$578 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series G-2018 is \$100.

Auction of 10-Year Treasury Inflation-Protected Security (TIPS)

On January 13, 2011, Treasury announced it would auction \$13,000 million of 10-year TIPS. The issue was to

refund \$39,466 million of securities maturing January 31 and to raise new cash of approximately \$72,534 million.

The 10-year TIPS of Series A-2021 were dated January 15 and issued January 31. They are due January 15, 2021, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of 1-1/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the TIPS before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on January 20. Tenders totaled \$30,809 million; Treasury accepted \$13,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.170 percent with an equivalent adjusted price of \$99.599898. Treasury accepted in full all competitive tenders at yields lower than 1.170 percent. Tenders at the high yield were allotted 30.64 percent. The median yield was 1.040 percent, and the low yield was 0.800 percent. Noncompetitive tenders totaled \$158 million. Competitive tenders accepted from private investors totaled \$12,842 million. Adjusted accrued interest of \$0.49735 must be paid for the period from January 15 to January 31. Both the unadjusted price of \$99.577991 and the unadjusted accrued interest of \$0.49724 were adjusted by an index ratio of 1.00022 for the period from January 15 to January 31.

In addition to the \$13,000 million of tenders accepted in the auction process, Treasury accepted \$259 million from FRBs for their own accounts. The minimum par amount required for STRIPS of TIPS of Series A-2021 is \$100.

FEBRUARY

Cash Management Bills

On February 22, 2011, Treasury announced it would auction \$25,000 million of 49-day bills. They were issued February 25 and matured April 15. The issue was to raise new cash. Treasury auctioned the bills on February 23. Tenders totaled \$118,699 million; Treasury accepted \$25,000 million. The high bank discount rate was 0.125 percent.

TREASURY FINANCING: JANUARY-MARCH, con.

on March 8. Tenders totaled \$112,470 million; Treasury accepted \$23,000 million, which included \$220 million of noncompetitive tenders from the public. The high bank discount rate was 0.260 percent.

Auction of 3-Year Notes

On March 3, 2011, Treasury announced it would auction \$32,000 million of 3-year notes. The issue was to raise new cash of approximately \$66,000 million.

The 3-year notes of Series X-2014 were dated and issued March 15. They are due March 15, 2014, with interest payable on September 15 and March 15 until maturity. Treasury set an interest rate of 1-1/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 8. Tenders totaled \$103,014 million; Treasury accepted \$32,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.298 percent with the equivalent price of \$99.859215. Treasury accepted in full all competitive tenders at yields lower than 1.298 percent. Tenders at the high yield were allotted 31.72 percent. The median yield was 1.267 percent, and the low yield was 1.197 percent. Noncompetitive tenders totaled \$60 million. Competitive tenders accepted from private investors totaled \$31,890 million. The minimum par amount required for STRIPS of notes of Series X-2014 is \$100.

Auction of 9-Year 11-Month 3-5/8 Percent Notes

On March 3, 2011, Treasury announced it would auction \$21,000 million of 9-year 11-month 3-5/8 percent notes. The issue was to raise new cash of approximately \$66,000 million.

The 9-year 11-month notes of Series B-2021 were dated February 15 and issued March 15. They are due February 15, 2021, with interest payable on August 15 and February 15 until maturity.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 9. Tenders totaled \$69,692 million; Treasury accepted \$21,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.499 percent with an equivalent price of \$101.044608. Treasury accepted in full all competitive tenders at yields lower than 3.499 percent. Tenders at the high yield were allotted 77.02 percent. The median yield was 3.475 percent, and the low yield was 3.410 percent. Noncompetitive tenders totaled \$69 million. Competitive tenders accepted from private investors totaled \$20,931 million. Accrued interest of \$2.80387 per \$1,000 must be paid for the period from February 15 to March 15. The minimum par amount required for STRIPS of notes of Series B-2021 is \$100.

Auction of 29-Year 11-Month 4-3/4 Percent Bonds

On March 3, 2011, Treasury announced it would auction \$13,000 million of 29-year 11-month 4-3/4 percent bonds. The issue was to raise new cash of approximately \$66,000 million.

The 29-year 11-month bonds of February 2041 were dated February 15 and issued March 15. They are due February 15, 2041, with interest payable on August 15 and February 15 until maturity.

Treasury received tenders for the bonds before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 10. Tenders totaled \$39,263 million; Treasury accepted \$13,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.569 percent with an equivalent price of \$102.929408. Treasury accepted in full all competitive tenders at yields lower than 4.569 percent. Tenders at the high yield were allotted 45.51 percent. The median yield was 4.530 percent, and the low yield was 4.459 percent. Noncompetitive tenders totaled \$19 million. Competitive tenders accepted from private investors totaled \$12,981 million. Accrued interest of \$3.67403 per \$1,000 must be paid for the period from February 15 to March 15. The minimum par amount required for STRIPS of bonds of February 2041 is \$100.

Auction of 2-Year Notes

On March 24, 2011, Treasury announced it would auction \$35,000 million of 2-year notes. The issue was to refund \$54,462 million of securities maturing March 31 and to raise new cash of approximately \$55,538 million.

The 2-year notes of Series AJ-2013 were dated and issued March 31. They are due March 31, 2013, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 0-3/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 28. Tenders totaled \$110,739 million; Treasury accepted \$35,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 0.789 percent with an equivalent price of \$99.922763. Treasury accepted in full all competitive tenders at yields lower than 0.789 percent. Tenders at the high yield were allotted 9.50 percent. The median yield was 0.750 percent, and the low yield was 0.686 percent. Noncompetitive tenders totaled \$387 million. Competitive tenders accepted from private investors totaled \$34,613 million.

In addition to the \$35,000 million of tenders accepted in the auction process, Treasury accepted \$1,570 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series AJ-2013 is \$100.

TREASURY FINANCING: JANUARY-MARCH, con.

Auction of 5-Year Notes

On March 24, 2011, Treasury announced it would auction \$35,000 million of 5-year notes. The issue was to refund \$54,462 million of securities maturing March 31 and to raise new cash of approximately \$55,538 million.

The 5-year notes of Series V-2016 were dated and issued March 31. They are due March 31, 2016, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 2-1/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 29. Tenders totaled \$97,578 million; Treasury accepted \$35,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.260 percent with an equivalent price of \$99.952972. Treasury accepted in full all competitive tenders at yields lower than 2.260 percent. Tenders at the high yield were allotted 11.14 percent. The median yield was 2.201 percent, and the low yield was 2.123 percent. Noncompetitive tenders totaled \$121 million. Competitive tenders accepted from private investors totaled \$34,879 million.

In addition to the \$35,000 million of tenders accepted in the auction process, Treasury accepted \$1,570 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series V-2016 is \$100.

Auction of 7-Year Notes

On March 24, 2011, Treasury announced it would auction \$29,000 million of 7-year notes. The issue was to refund \$54,462 million of securities maturing March 31 and to raise new cash of approximately \$55,538 million.

The 7-year notes of Series J-2018 were dated and issued March 31. They are due March 31, 2018, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 2-7/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 30. Tenders totaled \$80,951 million; Treasury accepted \$29,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.895 percent with an

equivalent price of \$99.874094. Treasury accepted in full all competitive tenders at yields lower than 2.895 percent. Tenders at the high yield were allotted 93.86 percent. The median yield was 2.825 percent, and the low yield was 2.769 percent. Noncompetitive tenders totaled \$35 million. Competitive tenders accepted from private investors totaled \$28,965 million.

In addition to the \$29,000 million of tenders accepted in the auction process, Treasury accepted \$1,301 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series J-2018 is \$100.

Auction of 9-Year 10-Month 1-1/8 Percent TIPS

On March 17, 2011, Treasury announced it would auction \$11,000 million of 9-year 10-month 1-1/8 percent TIPS. The issue was to refund \$54,462 million of securities maturing March 31 and to raise new cash of approximately \$55,538 million.

The 9-year 10-month TIPS of Series A-2021 were dated January 15 and issued March 31. They are due January 15, 2021, with interest payable on July 15 and January 15 until maturity.

Treasury received tenders for the TIPS before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on March 24. Tenders totaled \$32,688 million; Treasury accepted \$11,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 0.920 percent with an equivalent adjusted price of \$102.584550. Treasury accepted in full all competitive tenders at yields lower than 0.920. Tenders at the high yield were allotted 77.76 percent. The median yield was 0.870 percent, and the low yield was 0.490 percent. Noncompetitive tenders totaled \$68 million. Competitive tenders accepted from private investors totaled \$10,932 million. Adjusted accrued interest of \$2.34611 per \$1,000 must be paid for the period from January 15 to March 31. Both the unadjusted price of \$101.914969 and the unadjusted accrued interest of \$2.33080 were adjusted by an index ratio of 1.00657, for the period from January 15 to March 31.

In addition to the \$11,000 million of tenders accepted in the auction process, Treasury accepted \$493 million from FRBs for their own accounts. The minimum par amount required for STRIPS of TIPS of Series A-2021 is \$100.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-1. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

² From date of additional issue in case of a reopening.

³ In reopenings, the amount accepted is in addition to the amount of original offerings.

⁴ Includes securities issued to the Federal Reserve System; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

Note.—Amounts listed as tendered and accepted are amounts tendered and awarded on auction day.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Public Debt revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, FMS revised procedures and categories in this table to agree with the Bureau of the Public Debt's publication changes.

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated ownership of U.S. Treasury securities. Information is primarily obtained from the Federal Reserve Board of Governors Flow of Funds data, Table L209. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund (IMF)*, holdings of convertible foreign currencies and reserve position in the *IMF*.

- Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table **IFS-3** shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

TABLE IFS-1.—U.S. Reserve Assets

[In millions of dollars. Source: Treasury International Capital Reporting System]

End of calendar year or month	Total reserve assets ¹ (1)	Gold stock ² (2)	Special drawing rights ^{1,3} (3)	Foreign currencies ⁴ (4)	Reserve position in International Monetary Fund ^{1,5} (5)
2006	65,895	11,041	8,870	40,943	5,040
2007	70,565	11,041	9,476	45,804	4,244

Feb.....	134,655	11,041	58,054	52,754	12,806
Mar.....	139,315	11,041	56,543	52,399	19,332
Apr.....	142,989	11,041	57,806	54,191	19,950

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs. Recent allocations are as follows: August 2009—\$43,069 million and September 2009—\$4,529 million.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions. Excludes outstanding reciprocal currency swaps with foreign central banks. As of end-April 2011, there were no swaps outstanding.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

Note.—Detail may not add to totals due to rounding.

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1990, 30-year maturity issue (Note: this bond was paid off in full in January 2004); Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally-sponsored agencies, and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.⁸ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on benchmark surveys as of end-June 2002, end-June 2003, end-June 2004, end-June 2005, end-June 2006, end-June 2007, end-June 2008, end-June 2009, and end-June 2010, respectively, and are comparable to those shown for the following dates.

Note.—Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data generally correspond to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

¹ Beginning April 1993, indicates current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Remaining face value of issue is \$264 million.

² Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

INTRODUCTION: Capital Movements

Background

Data relating to U.S. international transactions in financial instruments and to other portfolio capital movements between the United States and foreign countries have been collected in some form since 1935. This information is necessary for compiling the U.S. balance of payments accounts, for calculating the U.S. international investment position, and for use in formulating U.S. international financial and monetary policies.

From the beginning, reporting under the Treasury data collection program has been mandatory. Under the current Treasury International Capital (TIC) reporting system, an assortment of monthly and quarterly reports are filed with district Federal Reserve banks by commercial banks, securities dealers, other financial institutions, and nonbanking enterprises in the United States. These data are centrally processed and maintained at the Federal Reserve Bank of New York, which, along with the district banks, acts as fiscal agent for Treasury. Beginning in late 1998, the Federal Reserve Board also undertakes services on behalf of Treasury in support of the TIC data collection system. The TIC reports of individual respondents are treated as confidential, and access to the respondent level data is strictly limited to specific staff of Treasury and the Federal Reserve System.

Data derived from Treasury reports are published in the Capital Movements section of this quarterly *Treasury Bulletin* and are posted monthly on the TIC website, <http://www.ustreas.gov/tic>. (See **NOTE** at the end of the INTRODUCTION text for additional website information.) TIC data aggregates are also published in the *Federal Reserve Bulletin* and are used in the U.S. international transactions and investment position compilations published by the Department of Commerce in the *Survey of Current Business*.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Requests for public comments on proposed changes are published in the *Federal Register*, and any further modifications are based on the comments received. The most recent revisions to selected reporting forms and instructions were effective June 30, 2006. The reporting forms and instructions may be downloaded from the TIC website. Copies of the reporting forms and instructions also may be obtained from the Global Economics Group, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district Federal Reserve banks.

Basic definitions

The term “foreigner” as used in TIC reporting covers all institutions and individuals resident outside the United States, including: U.S. citizens domiciled abroad; the foreign branches, subsidiaries and offices of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term “foreigner” also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. This information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any single country, but are accounted for in regional groupings of such organizations. Effective beginning with data for June 2006, information pertaining to the Bank for International Settlements is now included with data for international organizations, and information for the European Central Bank is distributed across the individual euro-area countries. For prior dates, information for these organizations is included in “Other Europe.”

“Short-term” refers to obligations payable on demand or having an original maturity of one year or less. “Long-term” refers to obligations having an original maturity of more than one year and includes securities having no maturity.

Reporting coverage

TIC reports are required from banks and other depository institutions, bank/financial holding companies (BHCs/FHCs), securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Institutions with total reportable liabilities, claims, or securities transactions below specified reporting thresholds are exempt from reporting.

Beginning in February 2003, substantial revisions to the coverage and formats of the TIC B-series and C-series forms were introduced. The reasons for the changes were to comply with new and expanded international standards for reporting data on portfolio investment; to reduce reporting burden; to clarify reporting concepts and instructions; and to improve the quality of the series by closing known gaps in the data.

Banks, other depository institutions, and securities brokers and dealers file monthly B-series reports covering their dollar liabilities to and dollar claims on foreigners in a number of countries. Quarterly reports are filed for liabilities and claims denominated in foreign currencies and for claims on foreigners held for respondents' domestic customers. All positions are exclusive of long-term securities. Beginning January 2001, the exemption level applicable to the banking reports was raised from \$15 million to \$50 million. This exemption level is also subject to the provision that reportable amounts for any one country do not exceed \$25 million.

Banks and other depository institutions, securities brokers and dealers, and other entities report their transactions with foreigners by country in long-term securities on monthly Form S. Respondents must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$50 million during the covered month.

TIC Form D is filed quarterly by all U.S. resident banks, securities dealers, and other firms with worldwide holding of derivatives in their own and in their customers' accounts exceeding \$100 billion in notional value. Data from this information collection was first released on May 15, 2007, with data on holdings beginning from end-December 2005, and data on net settlements beginning from the first quarter of 2006.

Quarterly reports are also filed by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities firms), and other nonbanking enterprises on their liabilities and claims positions with unaffiliated foreigners. Separate reports are filed for financial balances and for commercial balances. Effective for reports filed as of March 31, 2003, the threshold applicable to Form CQ-1 for reporting financial liabilities to, and claims on, foreigners is \$50 million, up from \$10 million. At the same time, the reporting threshold for Form CQ-2, which covers commercial liabilities and claims positions with foreigners, was raised from \$10 million to \$25 million.

Effective with the reports filed for June 2006, the country coverage of the monthly TIC forms was expanded significantly and the semiannual reports, which covered the smaller market economies, were discontinued. Country coverage was also expanded for the quarterly banking forms, the Form S, the Form D, and the Forms CQ-1 and CQ-2, effective with reports filed for June 2006.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. Except as noted in Section IV in "Description of statistics" below, the principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international

capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

Effective with the December 2009 Treasury Bulletin, a number of data reporters were reclassified in the TIC system as bank holding companies, beginning with the reports as of the fourth quarter of 2008. These data reporters are now included in the monthly bank-reported statistics and are no longer reporting as nonbanks.

Description of statistics

Data collected on the TIC forms are published in the "Capital Movements" tables in four sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and detailed breakdowns of the latest available data. The expansion of the country coverage on the standard report forms allows for publication of additional country detail for data beginning as of June 2006. As a result, the former Capital Movements Section III, which listed bank-reported claims and liabilities of selected countries from the semiannual reports, has been discontinued.

- Section I** covers liabilities to foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for all domestic nonbank, non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Dollar-denominated liabilities are reported monthly on Forms BL-1 and BL-2. Liabilities denominated in foreign currencies are reported quarterly on Form BQ-2. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners. Effective with reports filed as of February 28, 2003, coverage was broadened to cover the positions of U.S. broker-dealer respondents with their affiliated foreign offices. (Depository institutions and BHCs/FHCs already reported such positions.) The scope of the reports was also extended to include cross-border brokerage balances as well as offshore sweep accounts and loans to U.S. residents in "managed" foreign offices of U.S. reporting institutions. Additionally, in a new Part 2, Form BQ-2 was expanded to include the foreign currency-denominated liabilities held by respondents for their domestic customers. Further, banks' own positions have been defined to be consistent with regulatory reports such as the FR 2950/2951 to include all amounts in the respondent's "due to/due from" accounts, unless in an instrument that is specifically excluded. Finally, the columns for demand deposits and non-transactions accounts are now combined, as are short-term U.S. agency securities and other negotiable and readily transferable instruments.

- Section II** presents claims on foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for their domestic nonbank and non-securities firm affiliates, other than their insurance affiliates, which report

separately on the C-series forms. Data on respondents' own dollar claims are collected monthly on Form BC. Information on claims held for domestic customers as well as on claims denominated in foreign currencies is collected on a quarterly basis only on Forms BQ-1 and BQ-2, respectively. Effective with reports filed as of February 28, 2003, reporting coverage was expanded as outlined in Section I. Additionally, columns were added for separate reporting of negotiable CDs and other short-term negotiable instruments issued by foreigners. Further, the foreigner category, "foreign official institutions," replaced the former, broader category, "foreign public borrowers," for consistency with the liabilities reporting on this sector.

- **Section III** (formerly reported as Section IV) shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities brokers and dealers), and other nonbanking enterprises in the United States. Data exclude claims on foreigners held by banks in the United States.

Historically, the TIC reports CQ-1 and CQ-2 exclude accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. Such accounts with foreign affiliates are reported by business enterprises to Commerce on its direct investment forms. There was an exception when reporting of foreign affiliate positions of insurance underwriting subsidiaries and financial intermediaries was included in Section B of Form CQ-1 for reports between end-March 2003 and end-March 2006. That reporting requirement was discontinued with the reports beginning as of June 2006.

- **Section IV** (formerly Section V) contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, securities brokers and dealers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly-issued securities as well as transactions in, and redemptions of, outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in Table IFS-3.

The geographical allocation of the transactions data indicates the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer, or the currency of denomination of securities. For instance, a U.S. purchaser's order for Japanese securities may be placed directly with an intermediary in London. In this instance, the transaction for Form S reporting purposes would be recorded opposite the United Kingdom and not opposite Japan. Similarly,

purchases and sales of U.S. securities for the account of an Italian resident may be placed, for example, in the Swiss market. In that case, the trades would be reported opposite Switzerland and not opposite Italy.

- **Section V** presents quarterly data on holdings and net cash settlements of cross-border derivatives contracts reported by banks, securities brokers, dealers, and nonfinancial companies in the U.S. with sizable holdings of derivatives contracts. Total holdings are divided between those contracts with positive fair values and those contracts with negative fair values from the perspective of the reporter. The fair (market) value is generally defined as the amount for which a derivative contract could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The data on U.S. net settlements with foreign residents include all cash receipts and payments made during the quarter for the acquisition, sale, or final closeout of derivatives, including all settlement payments under the terms of derivatives contracts such as the periodic settlement under a swap agreement and the daily settlement of an exchange-traded contract. In calculating net settlements, U.S. receipts of cash from foreign persons are positive amounts (+), and U.S. payments of cash to foreign persons are negative amounts (-). Items excluded from net settlements are: (a) collateral including initial and maintenance margins, whether or not in the form of cash; and (b) purchases of underlying commodities, securities, or other noncash assets. (e.g., the purchase/sale by foreigners of a long-term security is reported on TIC Form S).

The gross fair (market) values and net settlement payments on derivatives are reported by type of derivative and by country based on the residence of the direct foreign counterparty. Positions of foreign customers on U.S. exchanges are reported opposite the country in which the foreign counterparty resides. In the case of U.S. residents' futures contracts on foreign exchanges, the country of the exchange is reported as the country of the foreign counterparty.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities on the gross foreign liabilities and claims reported by banks and nonbanks in the United States and on derivatives contracts with foreigners are available on the TIC website: <http://www.ustreas.gov/tic>. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website are other series, including a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated monthly.

SECTION I.—Liabilities to Foreigners Reported by Banks in the United States

Grand total	4,706,310	4,906,656	4,479,544	4,620,159	4,901,094

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

U.S. liabilities to foreigners reported by U.S. banks were recorded at \$4.9 trillion in March 2011, an increase of \$281 billion from yearend 2010. U.S. banking liabilities include foreign holdings of U.S. short-term securities but exclude foreign holdings of U.S. long-term securities. U.S. banking liabilities decreased about \$427 billion in 2009 but increased about \$200 billion in 2008 and about \$141 billion in 2010. However, the 2008 increase is primarily attributable to the addition of several new bank holding companies to the reporter panel.

U.S. banking liabilities are concentrated in international financial centers. The data on this page show that over 60 percent of U.S. banking liabilities is currently recorded against the United Kingdom and banking centers in the Caribbean. These financial centers recorded most of the decline in banking liabilities from 2007 through 2009. However, the crisis affected other regions as well, including all other Europe and Asia (including Japan), all of which experienced a decline in banking liabilities against the United States in 2009. This downward trend in U.S. liabilities to foreigners reversed in 2010, and U.S. liabilities continued to grow during the first quarter of 2011 for most regions. Asia was an exception, with U.S. liabilities as of March 2011 remaining below the level recorded at the end of 2009.

Caribbean banking centers ¹ ..	1,061,389	1,239,679	1,390,009	1,355,849	1,583,593
Japan	157,671	97,856	101,218	185,928	289,372
All other Asia	89,770	111,059	66,572	97,355	142,533
Subtotal	2,919,079	3,505,229	3,390,589	3,572,880	4,013,719
All other countries	221,485	309,079	328,604	392,988	517,127
Grand total	3,140,564	3,814,308	3,719,193	3,965,868	4,530,846

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

In December 2010, U.S. claims on foreigners reported by U.S. banks amounted to about \$4.5 trillion, an increase of \$565 billion from that recorded at yearend 2009. U.S. banking claims include holdings of foreign short-term securities but exclude holdings of foreign long-term securities. U.S. banking claims increased \$247 billion in 2009 and \$674 billion in 2007. However, they decreased \$95 billion during the global financial crisis in 2008, despite an increase from the addition of several new bank holding companies to the reporter panel.

As with U.S. banking liabilities, U.S. banking claims on foreigners are concentrated in international financial centers. Nearly 65 percent of these claims are reported opposite the United Kingdom and banking centers in the Caribbean. These financial centers accounted for much of the decline in U.S. banking claims from 2007 through 2009. U.S. banking claims on most regions recovered during 2010. An exception was Europe other than the United Kingdom, where claims in December 2010 remained well below the levels recorded in December 2007. The share of U.S. claims accounted for by “All other countries”, which includes Australia and Canada as well as countries in Latin America, has increased steadily over the past 4 years.

**SECTION III.—Liabilities to, and Claims on, Unaffiliated Foreigners
Reported by Nonbanking Business Enterprises
in the United States**

¹ Before June 2006, data for Cyprus, Kazakhstan, Monaco, and Ukraine are included in "All other Europe."

² On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "All other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in December 1994 for the former Yugoslav Republic of Macedonia.

³ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. For data as of January 2008, also includes Cyprus, Malta, and Slovenia. For data as of January 2009, also includes Slovakia. For data as of January 2011, also includes Estonia.

⁴ As of May 2004, the European Union includes Austria, Belgium, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy,

Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and the United Kingdom. Data available beginning June 2006. As of January 2007, also includes Bulgaria and Romania.

⁵ Before June 2006, data for Costa Rica are included in "All other Latin America."

⁶ Before June 2006, data for Anguilla, Barbados, and the British Virgin Islands are included in "All other Caribbean."

⁷ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

⁸ Includes Algeria, Gabon, Libya, and Nigeria.

⁹ Includes European, Latin American, Caribbean, Asian, African, and Middle East regional organizations.

TABLE CM-IV-4.—U.S. Transactions with Foreigners in Long-Term Domestic and Foreign Securities, by Type and Country, During First Quarter 2011, Preliminary

¹ Before June 2006, data for Cyprus, Kazakhstan, Monaco, and Ukraine are in "All other Europe."

² On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "All other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in December 1994 for the former Yugoslav Republic of Macedonia.

³ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. For data as of January 2008, also includes Cyprus, Malta, and Slovenia. For data as of January 2009, also includes Slovakia. For data as of January 2011, also includes Estonia.

⁴ Before June 2006, data for Costa Rica are included in "All other Latin America."

⁵ Before June 2006, data for Anguilla, Barbados, and the British Virgin Islands are included in "All other Caribbean."

⁶ Includes European, Latin American, Caribbean, Asian, African, and Middle East regional organizations.

¹ Before June 2006, data for Cyprus, Kazakhstan, Monaco, and Ukraine are included in "All other Europe."

² On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "All other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in December 1994 for the former Yugoslav Republic of Macedonia.

³ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. For data as of January 2008, also includes Cyprus, Malta, and Slovenia. For data as of January 2009, also includes Slovakia. For data as of January 2011, also includes Estonia.

⁴ Before June 2006, data for Costa Rica are included in "All other Latin America."

⁵ Before June 2006, data for Anguilla, Barbados, and the British Virgin Islands are included in "All other Caribbean."

⁶ Includes European, Latin America, Caribbean, Asian, African, and Middle East regional organizations.

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

The data on this page represent foreign investors' purchases and sales of long-term U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported in the TIC reporting system. Foreign investors have also acquired U.S. equities through mergers and reincorporations that involve stock swaps, but these acquisitions have been relatively small in recent years, totaling \$11 billion in 2007, no acquisitions in 2008, and acquisitions of less than \$1 billion in 2009. Stock swap acquisitions picked up to over \$8 billion in 2010, and this pace of acquisition picked up further during the first quarter of 2011 to \$4.6 billion. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website. The TIC Website also provides estimates from the Federal Reserve Bank of New York on principal repayment flows of foreign holdings of U.S. government agency and corporate asset-backed securities (ABS). These repayments are estimated to have reduced foreign net purchases of U.S. securities by \$234 billion in 2007, \$191 billion in 2008, \$204 billion in 2009, \$232 billion in the 2010, and \$48 billion in the first quarter of 2011.

After including stock swaps and accounting for ABS repayment flows, net foreign acquisitions of U.S. securities totaled \$782 billion in 2007. Net acquisitions slowed dramatically in 2008 to \$224 billion, as foreign investors continued to acquire U.S. securities in the first half of the year, but on net sold U.S. securities in the second half of the year. Foreign net purchases recovered to \$436 billion in 2009. The pace of acquisition picked up further in 2010, when foreign net purchases were recorded \$687 billion, far surpassing 2008 and 2009 levels and nearly recovering the momentum recorded in 2007. The pace of acquisition has slowed so far in 2011 to only \$118 billion in the first quarter.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors*

[In millions of dollars. Source: Treasury International Capital Reporting System]

Type	Calendar years					
	2006	2007	2008	2009	2010	2011 Jan. - Mar.
Foreign bonds	144,452	133,905	-53,942	127,474	67,382	7,836
Foreign stocks	106,455	95,300	-20,246	59,360	60,615	47,391
Total	250,907	229,205	-74,188	186,834	127,997	55,227

* Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the TIC reporting system. U.S. investors also have acquired foreign stocks through mergers that involve stock swaps. Net acquisitions through stock swaps amounted to \$19 billion in 2006, \$12 billion in 2007, \$7 billion in 2008, \$2 billion in 2009, and \$12 billion in 2010. No stock swaps were recorded during the first quarter of 2011. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website.

Including acquisitions through stock swaps, U.S. net purchases of long-term foreign securities amounted to \$270 billion in 2006, but then eased somewhat to \$241 billion in 2007. U.S. investors switched to net sales of \$67 billion in foreign securities in 2008. U.S. investors resumed their net purchases of foreign securities in 2009 with acquisitions of \$189 billion. Net purchases slowed slightly in 2010 to \$140 billion; however, U.S. investors' appetite for foreign securities recovered notably during the first quarter of 2011 to \$55 billion, with especially strong purchases of foreign stocks.

INTRODUCTION: Foreign Currency Positions

The “Treasury Bulletin” reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate “all other” currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$5 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VI-1 present the currency data reported weekly by major market participants. Tables I-2 through VI-2 present more detailed currency data of major market participants, based on monthly reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants that do not file weekly reports. The information in the tables referenced above is based on the reports referenced in this Introduction: Foreign Currency Positions and is not audited by the Federal Reserve banks or the Treasury Department.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option’s value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

TABLE ESF-1.—Balances as of Sept. 30, 2010, and Dec. 31, 2010

TABLE ESF-2.—Income and Expense

[In thousands of dollars. Source: Office of the Assistant Secretary of the Treasury for Management]

	Current quarter Oct. 1, 2010, through Dec. 31, 2010	Fiscal year to date Oct. 1, 2010, through Dec. 31, 2010
Income and expense		
Profit (+) or loss (-) on:		
Foreign exchange	125,660	125,660
Adjustment for change in valuation of SDR holdings and allocations ¹	-25,658	-25,658
Interest (+) or net charges (-) on:		
SDRs.....	2,275	2,275
U.S. Government securities.....	6,386	6,386
GSE Securities.....	-	-
Foreign exchange.....	57,414	57,414
Insurance premiums	-	-
Commissions	-	-
Income from operations.....	166,077	166,077
Net income (+) or loss (-).....	166,077	166,077

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the SDRs based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

Note. — Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

SPECIAL

REPORTS

Trust Funds

TABLE TF-6A.—Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as “unfunded authorizations” is the latest estimate received from the DOT for fiscal year 2011.

The 48-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury’s Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal year 2011.

Highway Account *

[In billions of dollars. Source: DOT]

Commitments (unobligated balances plus unpaid obligations, fiscal year 2012)	105
less:	
Cash balance (fiscal year 2012)	8
Unfunded authorizations (fiscal year 2012)	97
48-month revenue estimate (fiscal years 2013, 2014, 2015, and 2016).....	143

* Assumes the current stream of revenues and spending levels are maintained.

Mass Transit Account *

[In billions of dollars. Source: DOT]

Commitments (unobligated balances plus unpaid obligations, fiscal year 2012)	17
less:	
Cash balance (fiscal year 2012)	2
Unfunded authorizations (fiscal year 2012)	16
48-month revenue estimate (fiscal years 2013, 2014, 2015, and 2016).....	20

* Assumes the current stream of revenues and spending levels are maintained. Numbers may not add due to rounding.

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-1, -2)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-1)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the

Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of March 2011, the debt limit was \$14,294,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-1)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States; and

international and regional organizations, wherever located. Also refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-2)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-Age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Noncompetitive tenders (“Treasury Financing Operations”)—This is a tender or bid to purchase a stated par amount of securities at the highest yield or discount rate awarded to competitive bidders for a single-price auction.

Obligations (“Federal Fiscal Operations”)—An unpaid commitment to acquire goods or services.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)—Treasury has historically offered packages of several “coupon” security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-2)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities,

they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 workdays.

State and local government series (SLGS) (FD-2)—Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLGS are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress

increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-2)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue’s interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
