Profile of the Economy

[Source: Office of Macroeconomic Analysis]

Real gross domestic product (GDP)

Growth in real gross domestic product (GDP) accelerated in the third quarter of 2003 to a 7.2 percent annual rate. That was more than double the pace in the previous quarter and the largest since the first quarter of 1984. Most forecasters had anticipated that real GDP would grow very rapidly in the third quarter, but the actual results were far above expectations. Real final demand for goods and services produced in the U.S. (GDP less inventories) surged at a 7.8 percent pace in the third quarter, up substantially from a 4.0 rate in the second quarter.

Contributing to the acceleration in growth in the third quarter were the effects of the fiscal stimulus legislation that was passed in May 2003, the Jobs and Growth Tax Relief Reconciliation Act (JGTRRA). Lower marginal tax rates for individuals and rebate checks for an increased child tax credit helped boost disposable (after-tax) personal income and raise growth in real personal consumption expenditures to a 6.6 percent annual rate. That was up from 3.8 percent in the second quarter and the largest gain since a rise of the same amount in the third quarter of 1997. Business fixed investment was also supported by JGTRRA, through increased depreciation writeoffs and a quadrupling of the expensing limit for small businesses. After growing at an 8.3 percent annual rate in the second quarter, real investment in equipment and software expanded at a 15.4 percent pace in the third quarter, the fifth increase in the past six quarters and the largest since the first quarter of 2000.

Other sectors contributing to the rise in real GDP in the third quarter were housing and foreign trade. Real residential

investment shot up at a 20.4 percent pace, the biggest gain in more than 7 years. Real exports grew at a 9.3 percent rate while real imports were virtually flat, held down by declines in petroleum, motor vehicles and parts, and other goods. As a consequence, the trade deficit narrowed by a sizable amount in the third quarter and that improvement added 0.84 percentage point to the real GDP growth rate.

Growth of Real GDP

(Percent change, fourth quarter to fourth quarter)

Inflation

Inflation at the consumer level has continued at a moderate pace so far in 2003, but there has been some acceleration at the producer price level. The consumer price index (CPI) rose at a 2.5 percent annual rate during the first 9 months of 2003, about the same as the 2.4 percent pace recorded during 2002. Energy prices increased at a faster pace this year, rising at a 15.4 percent rate following an increase of 10.7 percent last year. The cost of food increased at a 2.7 percent annual rate so far this year following a 1.5 percent advance last year. Offsetting the acceleration in food and energy costs was a slowing in “core” inflation (prices excluding food and energy). Core inflation, generally viewed as a gauge of the underlying price trends, decelerated to a very low 1.1 percent pace during the first 9 months of 2003 from 1.9 percent last year.

At the producer level, finished goods prices rose at a 4.8 percent annual rate during the first 10 months of the year, following a modest 1.2 percent increase during 2002. As with the CPI, rising energy costs and food prices have contributed to the overall acceleration. Over the first 10 months of the year, energy prices rose at a 13.1 percent annual rate, somewhat faster than the 12.3 percent increase registered last year. Wholesale food prices increased at a 9.4 percent pace so far this year after dipping modestly last year. Core prices increased at a modest 1.4 percent pace through October of this year after registering a slight decline last year. Further back in the production chain, core intermediate materials prices jumped up in October but had changed little for 7 months.

Hourly compensation costs (including stock options) as calculated in the national income accounts for the private nonfarm business sector increased by 3.1 percent at an

annual rate during the first three quarters of 2003. This was well below the 5.8 percent annual rate rise in productivity, yielding a 2.5 percent drop in unit labor costs. Unit labor costs fell by 1.6 percent across the four quarters of 2002. The employment cost index (ECI) for total compensation, a

fixed-weighted compensation measure that does not account for stock options, increased at a 4.2 percent annual rate during the first three quarters of 2003, boosted by a surge in benefit costs. This is up from a 3.4 percent increase last year.

Consumer Prices

(Percent change from a year earlier)

Producer Prices - Finished Goods

(Percent change from a year earlier)

Employment and unemployment

Labor market conditions started to improve late in the summer of 2003. Payroll employment growth resumed in August and persisted through October. The unemployment rate continued to ease from an 8-year high of 6.4 percent in June and by October had dipped to 6.0 percent.

Nonfarm payroll employment rose by 126,000 in October on top of increases totaling 160,000 in the prior 2 months. The 3-month string of job gains was the best since before the recession started in March 2001. Several industries within the services sector added workers in October, including temporary help supply, which is viewed by some as a good indicator of future labor demand. Manufacturing payrolls continued to shrink in October for the 39th straight month, although the pace of decline appears to be slowing. About 2.8 million factory jobs have been eliminated since July 2000. Total payroll employment has fallen by 2.4 million since it peaked in February 2001 and is

down by about 3/4 of a million since the November 2001 recession trough.

The unemployment rate eased by 0.1 percentage point in October to 6.0 percent. Although still elevated compared to the 5.8 percent rate averaged in 2002, the current jobless rate is relatively low compared to highs of 7.8 percent in 1992 and 10.8 percent in 1982.

The apparent rebound in labor demand has not yet translated into stronger wage growth. Over the 12 months ended in October, average hourly earnings of nonfarm production workers rose just 2.4 percent—the smallest year-over-year increase since 1994. Growth in earnings adjusted for inflation slowed to 0.5 percent over the 12 months ended in September (by the latest available statistics) from 1.6 percent during the year-earlier period. The moderation in real wage growth over the past year is partly due to higher inflation that stems mainly from an increase in energy prices.

Unemployment Rate

Establishment Employment
(Average monthly change in thousands)

*Based on October data

Real disposable personal income and consumer spending

Personal income in nominal terms grew at a 3.5 percent annual rate during the first three quarters of 2003. The pace accelerated from an annual rate of 2.0 percent in the third quarter of last year to 4.0 percent in the latest quarter. Growth in wages and salaries, which account for just under 60 percent of personal income, accelerated to a 2.3 percent annual rate during the first three quarters from 1.9 percent last year. Transfer payments from government to individuals rose at a 6.5 percent annual rate in the first three quarters of this year, down from a 9.5 percent pace last year. Gains in other labor income, consisting mainly of employer contributions to pension funds and health insurance, slowed from 9.4 percent last year to a 4.1 percent annual rate so far in 2003. Dividend income continued to grow, up at a 6.9 percent rate this year following a 6.4 percent pace in 2002. After registering only the second measurable gain in the last 2-1/2 years in the second quarter, interest income was little changed in the third quarter of this year.

Disposable (after-tax) income adjusted for inflation rose at a 3.8 percent annual rate through the third quarter of the year. Lower taxes and advance payments of the child tax credit legislated in the Jobs and Growth Tax Relief Reconciliation Act of 2003 contributed to a jump of 7.2 percent in the third quarter.

Real consumer spending gradually picked up over the course of the year. Following a modest 1.7 percent annual rate increase in the fourth quarter of 2002, growth in real

spending accelerated to a 6.6 percent pace in the third quarter of 2003. Spending in the third quarter benefited from the jump in disposable income. Consumer spending in the third quarter rose at a slightly slower rate than after-tax income, pushing the personal saving rate up to 3.3 percent from 3.2 percent in the second quarter. The saving rate stood at 3.5 percent in the first quarter and averaged 3.7 percent during 2002, up from a 63-year low of 2.3 percent in 2001.

Industrial production and capacity utilization

Industrial production has shown signs of turning around in the second half of 2003. Output from factories, mines, and utilities rose by 4.0 percent at an annual rate in the third quarter after falling at the same rate in the second quarter. Production increased 0.2 percent in October, the fourth consecutive monthly gain, but was up only 0.6 percent in the latest 12 months, reflecting weakness in prior quarters.

Manufacturing production, which accounts for more than 83 percent of all industrial output, advanced by a large 0.7 percent in September and by an additional 0.1 percent in October. Factory output rose 3.6 percent at an annual rate in the third quarter after dipping 3.2 percent in the second quarter. Production of motor vehicles and parts surged by a 19.2 percent annual rate in the third quarter following an 11.2 percent decline in the second quarter. Vehicle and part production declined a sharp 3.8 percent in October, however, holding down growth in manufacturing for the month. Apart from automobiles, manufacturing output rose 2.3 percent in

the third quarter following a decline of roughly the same amount in the second quarter. Production in the high-technology industries (computers, communications equipment, and semiconductors) jumped by roughly 30 percent at an annual rate in the third quarter, the strongest advance for this category in 3 years. Computers, office equipment, and semiconductors contributed to the sharp gain in the third quarter. Communications equipment remains the weakest segment of the high-technology industries as it fell at a 7 percent annual rate in the third quarter. Nondurable manufacturing edged down by a 0.2 percent annual rate in the third quarter, with apparel and textiles reflecting the greatest weakness. Production at utilities, which accounts for almost 10 percent of total industrial output, rose by a 10.2 percent annual rate in the third quarter after a 13.3 percent contraction in the second quarter. Output at mines (the remaining 7 percent of industrial output) has been relatively little changed in recent quarters.

The capacity utilization rate for the industrial sector edged up to 75.0 percent in October, but is just 1.0 percentage point above its recent two-decade low reached in June and 6.3 percentage points below the long-term average of 81.3 percent. Capacity utilization ranged between 82 and 85 percent in the 1994–1999 period. Capacity utilization in the manufacturing sector remained unchanged at 73.5 percent in October, 6.7 percentage points below its long-term average of 80.2 percent. Utilization in the high-tech industries has been on the rise recently and increased to 66.1 percent in October, the highest reading since mid-2001. That is still well below its long-term average of 79.2 percent.

Nonfarm productivity and unit labor costs

Productivity continues to advance at a blistering pace, helping to restrain inflation while restoring business profits. Nonfarm business productivity (real output per hour worked) surged by 8.1 percent at an annual rate in the third quarter. Over the most recent four quarters, labor productivity rose by a strong 4.7 percent, an acceleration from the “New Economy” productivity growth rate of 3.1 percent averaged since 1995 and significantly better than the 1.4 percent averaged from 1973 to 1995.

Hourly labor compensation rose by 3.1 percent at an annual rate in the third quarter and by 2.7 percent during the past four quarters. Unit labor costs remain contained, however, due to the strong growth in productivity. Unit labor costs fell at a 4.6 percent rate in the third quarter and were down 1.9 percent over the past four quarters. This year promises to mark the third year in a row of falling unit labor costs.

Productivity in manufacturing advanced by a sharp 8.6 percent annual rate in the third quarter but was up by a more moderate 3.8 percent over the most recent four quarters. Despite the solid productivity growth in this sector, gains

have generally come as a result of declines in hours worked rather than significant boosts in output. Output rose at a 2.9 percent pace in the third quarter, but hours worked declined 5.2 percent.

Hourly compensation in manufacturing advanced by 4.3 percent at an annual rate in the third quarter and by 4.5 percent over the past four quarters. Continued productivity gains have controlled unit labor costs, however. These costs fell at a 4.0 percent pace in the third quarter and were up only 0.7 percent over the latest four quarters.

International transactions

The current account measures trade in goods and services as well as the flow of investment income and unilateral transfers (including government grants and pension payments, and private transfers to and from foreigners). The current account has been in deficit almost continuously since the early 1980s but has fluctuated widely over time. Since late 2001, steady growth of the trade deficit has caused the current account gap to widen sharply, and by the first quarter of 2003, it had reached a record high of \$554.8 billion at an annual rate, or 5.2 percent of GDP. In the second quarter, an increase in the surplus on investment income and a decline in unilateral transfers offset a rise in the trade deficit, causing the current account deficit to narrow slightly to \$554.7 billion, or 5.1 percent of GDP.

The current account is, by definition, matched by offsetting transactions in the capital and financial accounts, with any difference in the recorded flows listed as a statistical discrepancy. Capital account transactions, which consist mainly of debt forgiveness and wealth transfers associated with immigration, are typically small and in the second quarter eased to \$1.3 billion at an annual rate from \$1.6 billion in the prior quarter.

The financial account measures transactions that alter the foreign financial assets and liabilities of the United States. Net financial inflows accelerated in the second quarter to \$594.4 billion at an annual rate from \$562.7 billion in the first quarter. The pickup reflected an increase in net foreign purchases of assets in the United States to \$1,021.1 billion from \$968.0 billion in the first quarter. Foreign private investors boosted their holdings of U.S. securities, buying up U.S. stocks at a rapid rate after a small sell-off in the first quarter. Foreign purchases of U.S. corporate bonds and Treasuries also rose in the April-to-June period, and net foreign sales of federally-sponsored agency bonds moderated. The step-up in foreign investment activity in the United States more than offset an increase in U.S.-owned assets abroad to \$426.7 billion in the second quarter from \$405.3 billion in the first quarter. A jump in U.S. claims on foreigners reported by U.S. banks was largely responsible for the increase.

Exchange rate of the dollar

The dollar’s trend, lower from a peak in February 2002, continued through the summer and early fall. In the 20 months between that peak and October, the nominal exchange value of the dollar relative to a broad index covering the currencies of 26 important U.S. trade partners depreciated by 10.2 percent. This decline follows a period of sustained appreciation that saw the dollar’s value surge by 12 percent between December 1999 and February 2002.

The decline has been a function mainly of dollar weakness against the seven currencies of the United States’ major trading partners, including the euro area countries, Japan, Canada, the United Kingdom, Australia, Sweden, and Switzerland. Since February 2002, the exchange rate of the dollar compared to an index of these currencies fell by 20.5 percent. Dollar depreciation against the yen and the euro,

whose combined weights account for roughly 55 percent of the major index, has been largely responsible. Over the same period, the dollar/euro exchange rate fell by 25.7 percent and the dollar/yen exchange rate fell by 18.2 percent, reflecting U.S. current account deficit concerns and brighter prospects for growth in Europe and Japan, and despite strong evidence of a building recovery in the United States.

The dollar remains relatively strong compared with the currencies of many other important trading partners, and the pace of its appreciation has recently increased somewhat. Since February 2002, the exchange value of the dollar compared to an index of currencies that includes Mexico, China, Brazil, and seven other Asian countries has appreciated by 4.1 percent. Since December 1999, this index has risen by nearly 12 percent.

Interest rates

The Federal Reserve’s monetary stance remains extremely accommodative. Since 2000, the Federal Open Market Committee has reduced the federal funds rate (the rate that banks and other financial institutions charge each other for overnight loans) 13 times, for a total of 5.5 percentage points, to 1 percent, its lowest level since 1958.

In the Treasury market, interest rates of all tenors eased substantially between 2000 and spring 2003. From a level above 6 percent in late 2000, the 3-month Treasury bill rate has declined almost steadily to below 1 percent as of mid-November. The 10-year Treasury yield trended downward from above 6.5 percent in early 2000 to less than 3.25 percent in June 2003. Since then, rates have moved broadly higher on perceptions of accelerating economic growth, but continue to fluctuate in a range of 4.0 percent to 4.5 percent as of mid-November.

Mortgage interest rates generally follow movements of the 10-year Treasury rate. The interest rate on a conventional 30-year fixed-rate loan fell from a monthly average peak of

8.5 percent in May 2000 to under 5.25 percent at mid-June of this year—lows not seen since the mid-1960s. Such exceptionally low rates boosted mortgage refinancings to record levels and helped free additional cash for consumption. The rate rose to an average of 6.25 percent in August, but has since edged lower in tandem with the fluctuation in 10-year Treasury yields.

Corporate bond yields reflect movements in long-term Treasury yields as well as numerous other factors. Moody’s seasoned Baa yield on corporate bonds reached a monthly average peak of almost 9 percent in May 2000. Since then, it has been buffeted by financial reporting scandals, perceptions of rising corporate and economic risks, and more recently, expectations of faster growth, leaving the yield at an average 6.7 percent in October. The spread between the Baa yield and the 10-year Treasury yield, a measure of investor risk appetite, increased to nearly 4 percentage points in late 2002 but has since narrowed sharply to an average of 2.5 percentage points as of October.

Short-term Interest Rates

(Percent)

Long-term Interest Rates

(Percent)

Housing

The housing sector continued to surprise on the upside in the third quarter of 2003, maintaining a strong pace of activity despite a rise in the average mortgage interest rate. After shooting up at more than a 50 percent annual rate in the second quarter, sales of new single-family homes rose a further 18 percent at an annual rate in the third quarter. The annualized selling pace reached 1.142 million, the highest quarterly level since the series started in 1963. Through three quarters of the year, new home sales are on pace to top the 1-million mark and break last year's record of 972,000. Resales of existing single-family homes have also been very strong, reaching a record-high 6.43 million at an annual rate in the third quarter. If maintained, resales would also represent an all-time annual high (series started in 1981).

Mortgage interest rates crept up in the third quarter from the lows reached at the end of the second quarter but were still very favorable. The mortgage rate for a 30-year conventional fixed-rate loan rose from 5.21 percent in late June to an average of 6.26 percent in the month of August, but retreated to just under 6 percent by the end of September. Demand for new homes was little affected by the modest increase in the rate as housing fundamentals remained favorable, including expansion of the home-buying population, the relative safety of housing as an investment, and continued home price appreciation. Refinancing activity slowed as rates rose, in contrast, but many homeowners will continue to benefit from past refinancings through reduced monthly mortgage payments and a lower debt burden, factors that will continue to support consumer spending and the economy.

The high level of demand for new homes spurred increased construction. Housing starts surged at an annual rate of 33 percent in the third quarter to 1.87 million units (also annualized). Over the last four quarters, starts were running at more than a 1.7 million annual pace, a level not seen since the last housing boom in the mid-1980s. Single-family housing starts were holding at about a 1.4 million unit pace in recent quarters before jumping to 1.5 million in the third quarter. Starts in the smaller and more volatile multi-family market were 359,000 at an annual rate in the third quarter, also up significantly from the previous quarter. In total, housing starts are on track to post their best year since 1986.

Federal budget

The Federal budget posted a deficit of \$374 billion in fiscal 2003. That was \$216 billion more than the deficit in fiscal 2002 and a record high. In relation to the U.S. economy, however, the deficit was a moderate 3.5 percent of GDP, below the shares of the early 1990s and 1980s when the deficit as a percent of GDP approached 5 percent and in one year hit 6.0 percent (in fiscal 1983).

Receipts in fiscal 2003 were \$1.782 trillion. That was down \$71 billion or 3.8 percent compared to the previous fiscal year. Net individual income taxes fell \$65 billion (7.5 percent) and net corporate taxes fell \$16 billion (12.3 percent). Other receipts such as those from social insurance and retirement rose. The decline in total receipts was the third in a row but less than the 6.9 percent decrease recorded in fiscal 2002. Erosion in the past 3 years primarily reflected

economic weakness, although the tax cuts enacted to jump-start growth were also a factor. Receipts fell to 16.6 percent as a share of GDP in fiscal 2003 from 17.9 percent in fiscal 2002 and a record high of 20.8 percent in fiscal 2000. The 2003 share was the lowest in 45 years.

Budget outlays in fiscal 2003 were \$2.157 trillion, which was \$146 billion or 7.2 percent higher than in the previous year. Growth was slower than the 7.9 percent increase recorded in the previous fiscal year, but brought outlays to a 20.1 percent share of GDP from 19.5 percent in the prior year. Outlays for national defense increased \$55.6 billion or 16 percent. Other major functions posting large growth in percentage terms were health (including Medicaid), Medicare, and income security (chiefly for unemployment insurance). Net interest payments fell 10.6 percent, reflecting lower interest rates.

Debt held by the public was \$3.9 trillion at the end of the fiscal year, up \$374 billion from the previous year. The size of the publicly-held debt in relation to the economy was 36.4 percent. That was higher than a recent low of 33.1 percent in fiscal 2001 but less than the more than 40 percent share that prevailed from the late 1980s through the 1990s.

Net national saving and investment

Net national saving, the source of funds for new investment, fell to 0.6 percent of net national product (NNP) in the first half of 2003 (latest available data) from 1.9 percent in 2002 and a recent high of 7.5 percent in 1998. (Net national saving and NNP exclude depreciation to replace worn-out or obsolete equipment, software, and structures used in production.)

The recent decline in the net national saving rate mostly stemmed from a change in the Federal budget from a surplus of 0.8 percent of NNP in calendar year 2001 to deficits of 2.2 percent in calendar year 2002 and 3.6 percent in the first half of this year. These deficits largely reflected the effects of the recession and the need for spending on homeland security following the terrorist attacks in 2001. State and local government budgets also fell into deficit equivalent to 0.4 percent of NNP in the first half of 2003 because of the weaker economy. Combined, the total public sector deficit was 4.0 percent of NNP in the first half of this year and 2.8 percent of NNP in calendar year 2002, compared to a surplus of 0.5 percent of NNP in 2001. Even so, so far this year the 2003 deficit is still near public sector deficits averaging 3.9 percent of NNP from 1982 to 1995.

In the first half of this year, private saving was 4.7 percent of NNP, the same as in 2002 but well above the rate of 3.3 percent in 2001, which was the lowest rate since 1938. Both personal saving and retained earnings reached lows in 2001 not seen in at least 50 years. Personal saving was 2.9 percent of NNP in the first half of this year and 3.2 percent in 2002, which were both substantially higher than the 1.9 percent in 2001. The low personal saving rate in 2001 reflected the enormous growth in the stock market before 2001 that boosted household wealth so much that there was less incentive to save from income. In contrast, the most recent rise in saving indicated greater caution on the part of consumers in the face of the stock market declines and the weak economy. Retained earnings of corporations were at 1.8 percent of NNP in the first half of this year, which was a bit above the rates of 1.5 percent in 2002 and 1.4 percent in 2001.

Net domestic investment (by government and private industry in structures, equipment, software, and inventory) slowed to 5.9 percent of NNP in the first half of this year from 6.1 percent in 2002 and almost 10 percent from 1998 through 2000. Nevertheless, the most recent rates of investment are still above rates of less than 5-1/2 percent in 1991 and 1992. A large part of investment during the last decade was financed from abroad. U.S. net foreign investment swung from 0.3 percent of NNP in 1991 to -6.1 percent in the first half of this year.

Net National Saving

(Saving as a percent of NNP)

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.

- Table **FFO-5** summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

- Table **FFO-6** includes customs collection of duties, taxes, and fees by districts and ports.

Budget Results and Financing of the U.S. Government and Fourth-Quarter Receipts by Source

Fourth-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the fourth quarter of fiscal 2003 supplements fiscal data reported in the September issue of the “Treasury Bulletin.” At the time of that issue’s release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts, net of refunds, were \$189.1 billion for the fourth quarter of fiscal 2003. This is a decrease of \$25.9 billion over the comparable prior year quarter. Withheld receipts decreased by \$9.1 billion and non-withheld receipts decreased by \$3.3 billion during this period. Refunds increased by \$13.5 billion over the comparable fiscal 2002 quarter. This difference generally relates to payments issued in accordance with provisions of the Jobs and Growth Tax Relief Reconciliation Act of 2003. There was an increase of \$1.9 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 2002.

Corporate income taxes—Net corporate income tax receipts were \$34.2 billion for the fourth quarter of fiscal 2003. This is an increase of \$2.1 billion compared to the prior year fourth quarter. The \$2.1 billion change is comprised of a

decrease of \$1.8 billion in estimated and final payments, and a decrease of \$3.9 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the fourth quarter of fiscal 2003 were \$158.8 billion, an increase of \$0.2 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by \$0.9 billion, \$0.2 billion, and -\$0.1 billion, respectively. There was a -\$3.2 billion accounting adjustment for prior years employment tax liabilities made in the fourth quarter of fiscal 2003, while there was a -\$1.3 billion adjustment in the fourth quarter of fiscal 2002.

Unemployment insurance—Unemployment insurance receipts, net of refunds, for the fourth quarter of fiscal 2003 were \$8.3 billion, an increase of \$2.8 billion over the comparable quarter of fiscal 2002. Net State taxes deposited in the United States Treasury increased by \$2.7 billion. Net Federal Unemployment Tax Act (FUTA) taxes did not change significantly from \$1.2 billion.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.2 billion for the fourth quarter of fiscal 2003. This was a negligible change from the comparable quarter of fiscal 2002.

Budget Results and Financing of the U.S. Government and Fourth-Quarter Receipts by Source, con.

Excise taxes—Net excise tax receipts for the fourth quarter of fiscal 2003 were \$19.6 billion, an increase of \$0.6 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.7 billion, a decrease of \$0.1 billion over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$5.2 billion for the fourth quarter of fiscal 2003. These receipts represent a decrease of \$1.2 billion over the same quarter in fiscal 2002.

Customs duties—Customs duties net of refunds were \$5.6 billion for the fourth quarter of fiscal 2003. This is an increase of \$0.2 billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the fourth quarter of fiscal 2003 were \$7.5 billion, a decrease of \$1.0 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks decreasing by \$1.9 billion.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of the Treasury's (Treasury's) operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include FRBs, Treasury Regional Financial Centers, Internal Revenue Service Centers, Bureau of the Public Debt, and various electronic systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositories maintaining tax and loan accounts. Under the Treasury tax and loan (TT&L) investment program, depository financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax

and loan accounts in interest-bearing obligations can participate. The program permits Treasury to collect funds through financial institutions and to leave the funds in TT&L depositories and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on TT&L financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so as collector depositories.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments that the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

² Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories as follows: withheld income taxes beginning March 1948; taxes on employers and employees

under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970; and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the “Treasury Bulletin” reflect the total. Further detailed information is published in the “Monthly Statement of the Public Debt of the United States.” Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

Effective January 1, 2001, Treasury’s Bureau of the Public Debt revised formats, titles, and column headings in the “Monthly Statement of the Public Debt of the United States,” Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public’s use of terms.

Treasury’s Financial Management Service (FMS) compiles data in the “Treasury Bulletin” tables FD-2 and FD-6 from the “Monthly Statement of the Public Debt of the United States.” Effective June 2001, FMS revised procedures and categories in these tables to agree with the Bureau of the Public Debt’s publication changes.

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.

- Table **FD-2 (Historical)** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities—that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the

funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”)

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4 1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.

- In table **FD-6 (Historical)**, the same debt information is compared as in table FD-6. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the “Monthly Statement of the Public Debt of the United States.” The information in this section of the “Treasury Bulletin” pertains only to marketable Treasury securities.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable Treasury notes and bonds. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks (FRBs), so that the “all other investors” category includes all private holdings.

- Table **PDO-2** presents the results of weekly auctions of 4-, 13-, and 26-week bills. Treasury bills mature each

Thursday. Issues of 4- and 13-week bills are *reopenings* of 26-week bills. Issues of *cash management* bills also are presented. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive bases.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years.

- Table **PDO-4** indicates the total amount of marketable securities allotted to each class of investor. The FRBs tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 4-, 13-, and 26-week bills.

TREASURY FINANCING: JULY-SEPTEMBER

[Source: Bureau of the Public Debt, Office of Financing]

JULY

Auction of 10-Year Inflation-Indexed Notes

On July 7, 2003, Treasury announced it would auction \$11,000 million of 10-year inflation-indexed notes to raise cash. The 10-year, 1-7/8 percent inflation-indexed notes of Series C-2013 were dated and issued July 15. They are due July 15, 2013, with interest payable on January 15 and July 15 until maturity.

Treasury received tenders for the notes before 12 noon eastern daylight savings time (e.d.s.t.) for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on July 9. Tenders totaled \$24,013 million; Treasury accepted \$11,000 million at the high yield of 1.999 percent with an equivalent price of \$98.881. Tenders at the high yield were allotted 85.08 percent. The median yield was 1.980 percent, and the low yield was 1.950 percent. Noncompetitive tenders totaled \$440 million. Competitive tenders accepted from private investors totaled \$10,560 million. The minimum par amount required for STRIPS of inflation-indexed notes is \$1,000.

Auction of 2-Year Notes

On July 21, 2003, Treasury announced it would auction \$25,000 million of 2-year notes of Series N-2005. The issue was to refund \$11,007 million of securities maturing July 31 and to raise new cash of approximately \$13,993 million.

The notes of Series N-2005 were dated and issued on July 31. They are due July 31, 2005, with interest payable on January 31 and July 31 until maturity. Treasury set an interest rate of 1-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.d.s.t. for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on July 23. Tenders totaled \$44,940 million; Treasury accepted \$25,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.510 percent with the equivalent price of \$99.980. Tenders at the high yield were allotted 1.86 percent. The median yield was 1.465 percent, and the low yield was 1.400 percent. Noncompetitive tenders totaled \$731 million. Competitive tenders accepted from private investors totaled \$24,269 million.

In addition to the \$25,000 million of tenders accepted in the auction process, Treasury accepted \$4,996 million from Federal Reserve banks (FRBs) for their own accounts. The minimum par amount required for STRIPS of notes of Series N-2005 is \$1,000.

AUGUST

August Quarterly Financing

On July 30, 2003, Treasury announced it would auction \$24,000 million of 3-year notes of Series H-2006, \$18,000 million of 5-year notes of Series G-2008 and \$18,000

TREASURY FINANCING: JULY-SEPTEMBER, con.

million of 10-year notes of Series D-2013. The issues were to refund \$42,377 million of Treasury securities maturing August 15 and to raise about \$16,309 million of new cash.

The 3-year notes of Series H-2006 were dated August 15. They are due August 15, 2006, with interest payable on February 15 and August 15 until maturity. Treasury set an interest rate of 2-3/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.d.s.t. for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on August 5. Tenders totaled \$31,575 million; Treasury accepted \$24,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.422 percent with an equivalent price of \$99.865. Treasury accepted in full all competitive tenders at yields lower than 2.422 percent. Tenders at the high yield were allotted 65.84 percent. The median yield was 2.350 percent, and the low yield was 2.250 percent. Noncompetitive tenders totaled \$278 million. Competitive tenders accepted from private investors totaled \$23,722 million.

In addition to the \$24,000 million of tenders accepted in the auction process, Treasury accepted \$3,907 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series H-2006 is \$1,000.

The 5-year notes of Series G-2008 were dated August 15. They are due August 15, 2008, with interest payable on February 15 and August 15 until maturity. Treasury set an interest rate of 3-1/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.d.s.t. for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on August 6. Tenders totaled \$44,711 million; Treasury accepted \$18,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.300 percent with an equivalent price of \$99.771. Treasury accepted in full all competitive tenders at yields lower than 3.300 percent. Tenders at the high yield were allotted 35.75 percent. The median yield was 3.278 percent, and the low yield was 3.200 percent. Noncompetitive tenders totaled \$237 million. Competitive tenders accepted from private investors totaled \$17,763 million.

In addition to the \$18,000 million of tenders accepted in the auction process, Treasury accepted \$3,354 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series G-2008 is \$1,000.

The 10-year notes of Series D-2013 were dated August 15. They are due August 15, 2013, with interest payable on

February 15 and August 15 until maturity. Treasury set an interest rate of 4-1/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.d.s.t. for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on August 7. Tenders totaled \$35,976 million; Treasury accepted \$18,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.370 percent with an equivalent price of \$99.036. Treasury accepted in full all competitive tenders at yields lower than 4.370 percent. Tenders at the high yield were allotted 82.62 percent. The median yield was 4.310 percent, and the low yield was 4.250 percent. Noncompetitive tenders totaled \$240 million. Competitive tenders accepted from private investors totaled \$17,760 million.

In addition to the \$18,000 million of tenders accepted in the auction process, Treasury accepted \$2,515 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series D-2013 is \$1,000.

Auction of 2-Year Notes

On August 25, 2003, Treasury announced it would auction \$25,000 million of 2-year notes. The issue was to refund \$13,075 million of securities maturing August 31 and to raise new cash of approximately \$11,925 million.

The notes of Series P-2005 were dated August 31 and issued September 2. They are due August 31, 2005, with interest payable on the last calendar day of February and August until maturity. Treasury set an interest rate of 2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.d.s.t. for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on August 27. Tenders totaled \$43,142 million; Treasury accepted \$25,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.040 percent with an equivalent price of \$99.922. Treasury accepted in full all competitive tenders at yields lower than 2.040 percent. Tenders at the high yield were allotted 0.89 percent. The median yield was 1.998 percent, and the low yield was 1.950 percent. Noncompetitive tenders totaled \$837 million. Competitive tenders accepted from private investors totaled \$24,163 million. Accrued interest of \$0.10989 per \$1,000 must be paid for the period from August 31 to September 2.

In addition to the \$25,000 million of tenders accepted in the auction process, Treasury accepted \$5,590 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series P-2005 is \$1,000.

TREASURY FINANCING: JULY-SEPTEMBER, con.**SEPTEMBER****Cash Management Bills**

On August 28, 2003, Treasury announced it would auction \$23,000 million of 12-day bills. They were issued September 3 and matured September 15. The issue was to raise new cash. Treasury auctioned the bills on September 2. Tenders totaled \$57,214 million; Treasury accepted \$23,000 million. The high bank discount rate was 0.980 percent.

On September 8, Treasury announced it would auction \$10,000 million of 4-day bills. They were issued September 11 and matured September 15. The issue was to raise new cash. Treasury auctioned the bills on September 10. Tenders totaled \$44,389 million; Treasury accepted \$10,000 million. The high bank discount rate was 0.940 percent.

Auction of 5-Year Notes

On September 8, 2003, Treasury announced it would auction \$16,000 million of 5-year notes of Series H2008. The issue was to raise new cash.

The notes of Series H-2008 were dated and issued September 15. They are due September 15, 2008, with interest payable on March 15 and September 15 until maturity.

Treasury received tenders for the notes before 12 noon e.d.s.t. for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on September 10. Tenders totaled \$39,477 million; Treasury accepted \$16,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.230 percent with an equivalent price of \$99.519. Treasury accepted in full all competitive tenders at yields lower than 3.230 percent. Tenders at the high yield were allotted 97.60 percent. The median yield was 3.210 percent, and the low yield was 3.150 percent. Noncompetitive tenders totaled \$133 million. Competitive tenders accepted from private investors totaled \$15,867 million. The minimum par amount required for STRIPS of notes of Series H-2008 is \$1,000.

Auction of 9-Year 11-Month 4-1/4 Percent Notes

On September 8, 2003, Treasury announced it would auction \$13,000 million of 9-year 11-month 4-1/4 percent notes of Series D-2013. The issue was to raise new cash.

The notes of Series D-2013 were dated August 15 and issued September 15. They are due August 15, 2013, with

interest payable on February 15 and August 15 until maturity.

Treasury received tenders for the notes before 12 noon e.d.s.t. for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on September 11. Tenders totaled \$29,002 million; Treasury accepted \$13,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.340 percent with an equivalent price of \$99.275. Treasury accepted in full all competitive tenders at yields lower than 4.340 percent. Tenders at the high yield were allotted 63.42 percent. The median yield was 4.313 percent, and the low yield was 4.240 percent. Noncompetitive tenders totaled \$65 million. Competitive tenders accepted from private investors totaled \$12,935 million. The minimum par amount required for STRIPS of notes of Series D-2013 is \$1,000.

Auction of 2-Year Notes

On September 22, 2003, Treasury announced it would auction \$25,000 million of 2-year notes of Series Q2005. The issue was to refund \$16,140 million of securities maturing September 30 and to raise new cash of approximately \$8,860 million.

The notes of Series Q-2005 were dated and issued September 30. They are due September 30, 2005, with interest payable on March 31 and September 30 until maturity. Treasury set an interest rate of 1-5/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.d.s.t. for noncompetitive tenders and before 1 p.m. e.d.s.t. for competitive tenders on September 24. Tenders totaled \$54,953 million; Treasury accepted \$25,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.695 percent with an equivalent price of \$99.863. Treasury accepted in full all competitive tenders at yields lower than 1.695 percent. Tenders at the high yield were allotted 78.20 percent. The median yield was 1.670 percent, and the low yield was 1.500 percent. Noncompetitive tenders totaled \$763 million. Competitive tenders accepted from private investors totaled \$24,237 million.

In addition to the \$25,000 million of tenders accepted in the auction process, Treasury accepted \$6,535 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series Q-2005 is \$1,000.

¹ All 4-week and 13-week bills represent additional issues of bills with an original maturity of 26 weeks or 52 weeks. Certain 26-week bills represent additional issues of bills with an original maturity of 52 weeks.

² Includes amount awarded to the Federal Reserve System.

³ Tenders for \$1 million or less from any one bidder are accepted in full at the high price of accepted competitive bids. All Treasury marketable auctions are conducted in a single-price format as of November 2, 1998.

⁴ Equivalent coupon-issue yield.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

² From date of additional issue in case of a reopening.

³ In reopenings, the amount accepted is in addition to the amount of original offerings.

⁴ Includes securities issued to the Federal Reserve System; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

Note.— Amounts listed as tendered and accepted are amounts tendered and awarded on auction day.

¹ Depository institutions include banks.

² Includes partnerships and personal trust accounts.

³ Residual.

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since July 1, 1980, and series I bonds, on sale since September 1, 1998, are the savings bonds currently being sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980, through October 31,

1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and in the Annual Report of the Secretary of the Treasury for fiscal 1974.

TABLE SBN-1.—Sales and Redemptions by Series, Cumulative through Sept. 30, 2003

[In millions of dollars. Source: "Monthly Statement of the Public Debt of the United States;" Bureau of the Public Debt, Office of Public Debt Accounting]

Series	Sales ¹ (1)	Accrued discount (2)	Sales plus accrued discount (3)	Redemptions ¹ (4)	Amount outstanding	
					Interest- bearing debt (5)	Matured non-interest- bearing debt (6)
Savings bonds:						
Series A-D ²	3,949	1,054	5,003	5,002	-	1
Series E, EE, H, and HH.....	853,568	235,291	1,088,859	391,806	272,301	8,832
Series I.....	16,217	860	17,077	816	19,373	-
Series F and G.....	28,396	1,125	29,521	29,517	-	3
Series J and K.....	3,556	198	3,754	3,753	-	-
Savings notes.....	862	714	1,576	1,331	-	101
Total.....	906,548	239,242	1,145,790	432,225	291,674	8,937

¹ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and HH bonds.

² Details by series on a cumulative basis and by period of series A-D combined can be found in the February 1952 and previous issues of the "Treasury Bulletin."

Note.—Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Public Debt revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, FMS revised procedures and categories in this table to agree with the Bureau of the Public Debt's publication changes.

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated amount of public debt securities held by private investors. Information is obtained from sources such as the Federal financial institution regulatory agencies. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

* Effective June 2001, FMS revised procedures and categories in this table to reflect the format changes in the "Monthly Statement of the Public Debt of the United States."

¹ Totals for "Intragovernmental Holdings" and "Total Treasury Securities Outstanding" do not agree with the Daily Treasury Statement (DTS) or the Monthly Statement of the Public Debt (MSPD) dated September 30, 2003, due to an adjustment of \$89 million reported by the Bureau of Public Debt after the publication of the DTS and the MSPD.

Face value.² Sources: Federal Reserve Bulletin, table 1.18, Federal Reserve Banks, statement of condition, for System Open Market Accounts; and U. S. Treasury for Government accounts. Federal Reserve holdings exclude Treasury securities held under repurchase agreements.³ Source: Federal Reserve Board of Governors, Flow of Funds Table L.209.⁴ Includes commercial banks, savings institutions, and credit unions.⁵ Source: "Monthly Statement of the Public Debt of the United States." Current accrual value.⁶ Includes U.S. Treasury securities held by the Federal Employees Retirement System Thrift Savings Plan "G Fund."⁷ Includes money market mutual funds, mutual funds, and closed-end investment companies.⁸ Source: Federal Reserve Board Treasury International Capital Survey. Includes nonmarketable foreign series Treasury securities and Treasury deposit funds. Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York. Estimates reflect the 1984 benchmark to December 1989, the 1989 benchmark to December 1994, and the 1994 benchmark to March 2000. The March 2000 benchmark was released in 2002.⁹ Includes individuals, Government-sponsored enterprises, brokers and dealers, bank personal trusts and estates, corporate and non-corporate businesses, and other investors.

Note.—Ownership data were revised (in June 1999) back to March 1989 in order to update ownership categories and to incorporate greater reliance on Flow of Funds data of the Federal Reserve Board.

INTRODUCTION: Market Yields

The table and chart in this section presents yields on Treasury marketable securities for maturities ranging from 1-month to 20-years.

Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes, and bonds. The Treasury yield curve in the accompanying chart is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

The Treasury uses quotations obtained by the Federal Reserve Bank of New York to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. The Board of Governors of the Federal Reserve System publishes the Treasury constant maturity data series in its weekly Statistical Release H.15.

On July 31, 2001, Treasury expanded its constant maturity index to include a 1-month constant maturity yield, and Table MY-1 now includes a 1-month maturity beginning on that date. On February 18, 2002, Treasury discontinued the 30-year constant maturity yield. In lieu of the 30-year yield, Table MY-1 will include a 20-year maturity. Historical data for the 20-year maturity is available from the Board of Governors' Statistical Release H.15.

Prior to January 2003, this section also included data on long-term Treasury, corporate and municipal yields (Table MY-2). Effective January 2003, Table MY-2 and Chart MY-B have been discontinued because Treasury no longer issues long-term bonds and no longer calculates or estimates long-term corporate rates.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, various U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund (IMF)*, holdings of convertible foreign currencies and reserve position in the *IMF*.

- Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table **IFS-3** shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

Apr.....	80,405	11,043	11,476	35,148	22,738
May.....	82,287	11,044	11,880	36,149	23,214
June.....	81,660	11,044	11,720	35,686	23,210
July.....	80,620	11,043	11,646	35,185	22,746
Aug.....	80,422	11,043	11,619	35,297	22,463
Sept.....	84,431	11,043	12,062	37,259	24,067
Oct.....	84,150	11,043	12,079	37,433	23,595

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

⁶ Includes an SDR \$361 million loan to the IMF under the General Arrangements to Borrow in July 1998, and an SDR \$619 million loan to the IMF under the New Arrangements to Borrow in December 1998.

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally-sponsored agencies and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank.⁸ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on a benchmark survey as of end-March 2000 and are comparable to those shown for the following dates.

Note.—Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data generally correspond to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

¹ Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Remaining face value of issue is \$3,060 million.

² Beginning March 1990, indicates current value of zero-coupon, 30-year maturity issue to the government of Mexico. Remaining face value of issue is \$5,126 million.

³ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

INTRODUCTION: Capital Movements

Background

Data relating to U.S. international transactions in financial instruments and to other portfolio capital movements between the United States and foreign countries have been collected in some form since 1935. This information is necessary for compiling the U.S. balance of payments accounts, for calculating the U.S. international investment position, and for use in formulating U.S. international financial and monetary policies.

From the beginning, reporting under the Treasury data collection program has been mandatory. Under the current Treasury International Capital (TIC) reporting system, an assortment of monthly, quarterly, and semiannual reports are filed with district Federal Reserve banks by commercial banks, securities dealers, other financial institutions, and nonbanking enterprises in the United States. These data are centrally processed and maintained at the Federal Reserve Bank of New York, which, along with the district banks, acts as fiscal agent for Treasury. Beginning in late 1998, the Federal Reserve Board also undertakes services on behalf of Treasury in support of the TIC data collection system. The TIC reports of individual respondents are treated as confidential, and access to the respondent level data and to some sensitive data aggregates is strictly limited to specific staff of Treasury and the Federal Reserve System.

Data derived from Treasury reports are published in the Capital Movements section of this quarterly *Treasury Bulletin* and are posted monthly on the TIC website, <http://www.ustreas.gov/tic>. (See NOTE at the end of the INTRODUCTION text for additional website information.) TIC data aggregates are also published in the *Federal Reserve Bulletin* and are used in the U.S. international transactions and investment position compilations published by the Department of Commerce in the *Survey of Current Business*.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms, and nonbanking enterprises. The most recent revisions to selected reporting forms and instructions were effective February 28, 2003. The major changes are outlined under “Description of statistics” below. Copies of the reporting forms and instructions may be obtained from the Office of Program Services, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district FRBs. Reporting forms and instructions also may be downloaded from the TIC website.

Basic definitions

The term “foreigner” as used in TIC reporting covers all institutions and individuals resident outside the United

States, including U.S. citizens domiciled abroad; the foreign branches, subsidiaries and offices of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term “foreigner” also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. This information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any single country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite “Other Europe.” For purposes of publication only, information on the European Central Bank also is included in “Other Europe.”

“Short-term” refers to obligations payable on demand or having an original maturity of one year or less. “Long-term” refers to obligations having an original maturity of more than one year and includes securities having no maturity.

Reporting coverage

TIC reports are required from banks and other depository institutions, bank/financial holding companies (BHCs/FHCs), securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Institutions with total reportable liabilities, claims, or securities transactions below specified reporting thresholds are exempt from reporting.

Beginning in February 2003, substantial revisions to the coverage and formats of the TIC B-series and C-series forms were introduced. The reasons for the changes were to comply with new and expanded international standards for reporting data on portfolio investment; to reduce reporting burden; to clarify reporting concepts and instructions; and to improve the quality of the series by closing known gaps in the data. Notices of these changes and requests for public comments on them were published in the *Federal Register* last year and some modifications were made in response to the comments received. A detailed outline of the changes affecting each form may be accessed on the TIC website.

Banks, other depository institutions, and securities brokers and dealers file monthly B-series reports covering their dollar liabilities to, and dollar claims on foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items attributed to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies and for claims on foreigners held for respondents' domestic customers. All positions are exclusive of long-term securities. Beginning January 2001, the exemption level applicable to the banking reports was raised from \$15 million to \$50 million. This exemption level is also subject to the provision that reportable amounts for any one country do not exceed \$25 million.

Banks and other depository institutions, securities brokers and dealers, and other entities report their transactions with foreigners by country in long-term securities on monthly Form S. Respondents must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$50 million during the covered month.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities firms), and other nonbanking enterprises on their liabilities and claims positions with foreigners. Except as noted below under "Description of statistics," the reportable liabilities and claims positions are with unaffiliated foreigners. Separate reports are filed for financial balances and for commercial balances. Effective for reports filed as of March 31, 2003, the threshold applicable to Form CQ-1 for reporting financial liabilities to, and claims on, foreigners is \$50 million, up from \$10 million. At the same time, the reporting threshold for Form CQ-2, which covers commercial liabilities and claims positions with foreigners, was raised from \$10 million to \$25 million.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. Except as noted in Section IV in "Description of statistics" below, the principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

Description of statistics

Data collected on the TIC forms are published in the "Capital Movements" tables in five sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and detailed breakdowns of the latest available data.

- **Section I** covers liabilities to foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for all domestic nonbank, non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Dollar-denominated liabilities are reported monthly on Forms BL-1 and BL-2. Liabilities denominated in foreign currencies are reported quarterly on Form BQ-2. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners. Effective with reports filed as of February 28, 2003, coverage was broadened to cover the positions of U.S. broker-dealer respondents with their affiliated foreign offices. (Depository institutions and BHCs/FHCs already reported such positions.) The scope of the reports was also extended to include cross-border brokerage balances as well as offshore sweep accounts and loans to U.S. residents in "managed" foreign offices of U.S. reporting institutions. Additionally, in a new Part 2, Form BQ-2 was expanded to include the foreign currency-denominated liabilities held by respondents for their domestic customers. Further, banks' own positions have been defined to be consistent with regulatory reports such as the FR 2950/2951 to include all amounts in the respondent's "due to/due from" accounts, unless in an instrument that is specifically excluded. Finally, the columns for demand deposits and non-transactions accounts are now combined, as are short-term U.S. agency securities and other negotiable and readily transferable instruments.

- **Section II** presents claims on foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for their domestic nonbank and non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Data on respondents' own dollar claims are collected monthly on Form BC. Information on claims held for domestic customers as well as on claims denominated in foreign currencies is collected on a quarterly basis only on Forms BQ-1 and BQ-2, respectively. Effective with reports filed as of February 28, 2003, reporting coverage was expanded as outlined in Section I. Additionally, columns were added for separate reporting of negotiable CDs and other short-term negotiable instruments issued by foreigners. Further, the foreigner category, "foreign official institutions," replaced the former, broader category, "foreign public borrowers," for consistency with the liabilities reporting on this sector.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, and securities brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December.

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than

banks, other depository institutions, and securities brokers and dealers), and other nonbanking enterprises in the United States. Data exclude claims on foreigners held by banks in the United States.

Historically, the information does not include any accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to Commerce on its direct investment forms. However, effective with reports filed as of March 31, 2003, a number of changes were introduced in the coverage and reporting formats of nonbanking forms. A major revision is the addition of Section B to Form CQ-1 to capture foreign affiliate positions (including those with affiliates of the respondent's parent) of insurance underwriting subsidiaries and financial intermediaries. Insurance underwriting subsidiaries of BHCs/FHCs now include positions vis-à-vis all foreign-resident affiliates. From end-March 2003 forward, financial intermediaries are to report positions vis-à-vis all foreign-resident affiliated financial intermediaries.

- **Section V** contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, securities brokers and dealers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly-issued securities as well as transactions in, and redemptions of, outstanding issues.

However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

The geographical allocation of the transactions data indicates the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer, or the currency of denomination of securities. For instance, a U.S. purchaser's order for Japanese securities may be placed directly with an intermediary in London. In this instance, the transaction for Form S reporting purposes would be recorded opposite the United Kingdom and not opposite Japan. Similarly, purchases and sales of U.S. securities for the account of an Italian resident may be placed, for example, in the Swiss market. In that case, the trades would be reported opposite Switzerland and not opposite Italy.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities and on the gross foreign liabilities and claims reported by banks in the United States are available on the TIC website: <http://www.ustreas.gov/tic>. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website are other series, including a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated monthly.

¹ These data as of June 30, 2003.² Excludes negotiable time certificates of deposit, which are included in "Other Liabilities."³ U.S. Treasury bills and certificates held in custody for the account of oil-exporting countries in "Other Asia" and "Other Africa" amount to \$1,972 million.⁴ Before January 2001, combined data reported for Belgium-Luxembourg.⁵ Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."⁶ Before January 2001, data included in United Kingdom.⁷ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and since June 1994 for the former Yugoslav Republic of Macedonia.⁸ Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

CHART CM-A.—U.S. Liabilities to Foreigners Reported by U.S. Banks, Brokers, and Dealers with Respect to Selected Countries

U.S. banking liabilities to foreigners, excluding long-term securities, were recorded at about \$2.3 trillion in September 2003, an increase of about \$225 billion from yearend 2002. Much of the increase in liabilities to foreigners this year reflects changes to the reporting scope of the TIC reporting system effective February 2003. Between June and September 2003, when data are reported on a consistent basis, U.S. banking liabilities were little changed. U.S. banking liabilities increased about \$345 billion in 2002, and \$120 billion in 2001.

U.S. banking liabilities are concentrated in international financial centers. The data on this page show that more than half of U.S. banking liabilities currently is recorded against the United Kingdom and banking centers in the Caribbean. These financial centers have recorded most of the growth in banking liabilities in recent years, and also recorded most of the reported increase in liabilities during the first half of 2003. Foreigners domiciled in the rest of Europe and in Asia account for about 40 percent of U.S. banking liabilities.

¹ Before January 2001, combined data reported for Belgium-Luxembourg.² Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."³ Before January 2001, data included in United Kingdom.⁴ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for

Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

⁵ Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."⁶ Before January 2001, data for Cayman Islands included in British West Indies.⁷ Before January 2001, data included in "All other."⁸ Before January 2001, included in "Latin American regional."

CHART CM-B.—U.S. Claims on Foreigners Reported by U.S. Banks, Brokers, and Dealers with Respect to Selected Countries

In June 2003, U.S. banking claims, excluding long-term securities, amounted to nearly \$1.8 trillion, an increase of about \$265 million from year-end 2002. In large part, the increase in claims reflects changes to the reporting scope of the TIC reporting system effective February 2003. In particular, these figures now include brokerage balances and positions with affiliated foreign offices reported by U.S. brokers and dealers.

As with U.S. banking liabilities, U.S. banking claims on foreigners are concentrated in international financial centers. About 60 percent of these claims are reported opposite the United Kingdom and banking centers in the Caribbean. These financial centers accounted for most of the increase in U.S. banking claims in the first half of this year. The share of claims against foreigners domiciled in Asia has declined over the past several years from about 20 percent at the end of 1996 to less than 10 percent currently.

¹ Before January 2001, combined data reported for Belgium-Luxembourg.

² Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."

³ Before January 2001, data included in United Kingdom.

⁴ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

⁵ Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."

⁶ Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

⁷ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

⁸ Includes Algeria, Gabon, Libya, and Nigeria.

⁹ Before January 2001, data included in "All other countries."

¹⁰ Before January 2001, data included in "Latin American regional."

¹ Before January 2001, combined data reported for Belgium-Luxembourg.

² Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."

³ Before January 2001, data included in United Kingdom.

⁴ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

⁵ Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."

⁶ Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

⁷ Before January 2001, data included in "All other countries."

⁸ Before January 2001, data included in "Latin American regional."

¹ Before January 2001, combined data reported for Belgium-Luxembourg.

² Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."

³ Before January 2001, data included in United Kingdom.

⁴ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

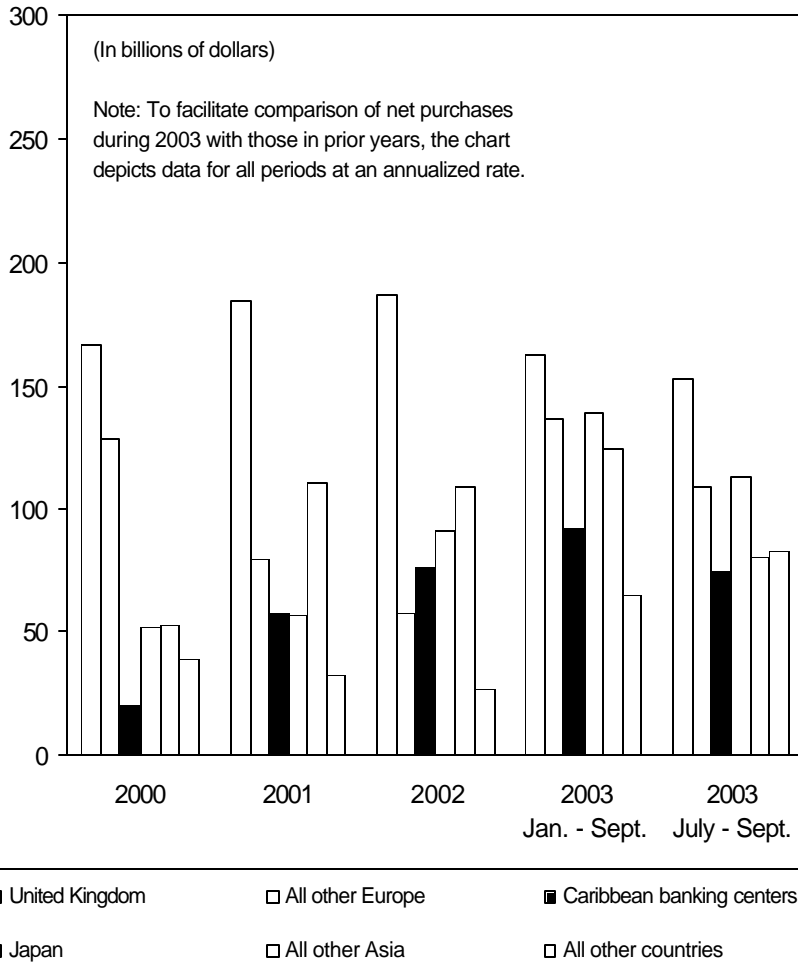

⁵ Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."

⁶ Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

⁷ Before January 2001, data included in "All other countries."

⁸ Before January 2001, data included in "Latin American regional."

CHART CM-C.—Net Purchases of Long-Term Domestic Securities by Foreigners, Selected Countries

The data on this page represent foreign investors' purchases and sales of long-term U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported to the TIC reporting system. Foreign investors also acquire U.S. equities through mergers that involve stock swaps. Net foreign acquisitions of U.S. equities through stock swaps amounted to \$21 billion in 2000, \$7 billion in both 2001 and 2002, and zero in the first three quarters of 2003. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.)

These stock swaps are not reported under the TIC reporting system, but stock swaps data are now available on the TIC Web site. In addition, the TIC Web site now includes estimates of principal payments on asset-backed U.S. Government agency and U.S. corporate bonds. These principal repayments on asset-backed securities (ABS) are the equivalent of sales by foreigners of these securities, but are not captured by the TIC reporting system. In the first three quarters of 2003, ABS principal repayments amounted to an estimated \$76 billion.

The data present aggregate net purchases for 2000 through the first three quarters of 2003. The figures show that foreigners' annual net purchases (gross purchases minus gross sales) of U.S. securities have maintained an extremely high level since 2000.

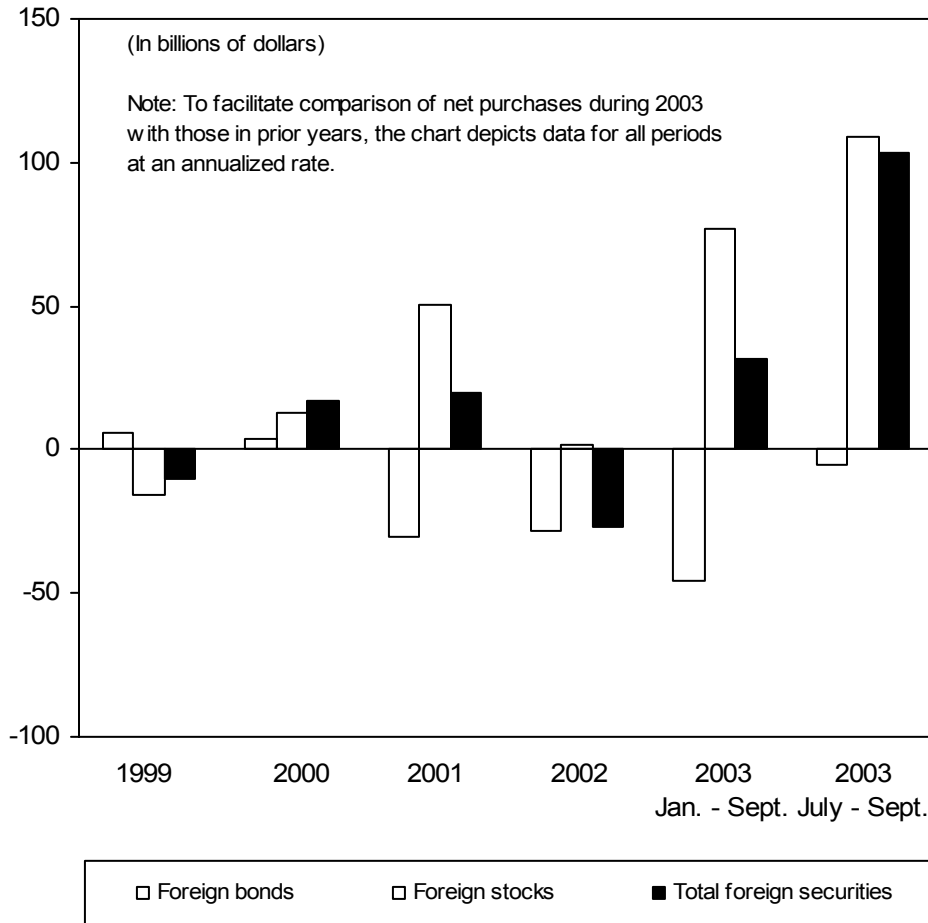

Annual net foreign purchases of U.S. securities first surpassed \$100 billion in 1993. In 2002, net foreign acquisitions (including stock swaps) of U.S. securities totaled a record \$554 billion. In the first three quarters of 2003, net foreign acquisitions of U.S. securities have accelerated to \$540 billion (\$465 billion when adjusted for ABS principal repayments), or over \$700 billion on an annual basis (over \$624 billion adjusted for ABS principal repayments).

¹ Includes Bahamas, Bermuda, British West Indies, Netherlands Antilles, and Panama.
² Beginning January 2001, Cayman Islands replaced British West Indies in reporting format.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors*

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the TIC reporting system. However, in the past several years, U.S. investors also have acquired a substantial amount of foreign stocks, mostly European, through mergers that involve stock swaps. Net acquisitions through stock swaps amounted to \$80 billion in 2000, \$45 billion in 2001, but only \$3 billion in 2002, and \$15 billion in the first three quarters of 2003. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are now available on the TIC Web site.

Including the stock swaps, annual U.S. net purchases of long-term foreign securities averaged about \$100 billion from the mid-1990s through 2000, without much variation from year to year. In 2001, U.S. investors sold \$31 billion in foreign bonds, but U.S. purchases of foreign stocks held up and U.S. acquisitions of foreign securities (including stock swaps) fell to only \$65 billion. In 2002, U.S. investors again sold foreign bonds (\$28 billion), but U.S. purchases of foreign stocks (including stock swaps) fell sharply and on net U.S. investors sold \$24 billion in foreign securities. In 2003, strong U.S. demand for foreign equities has offset continued net sales of foreign bonds; on net (including stock swaps) U.S. investors acquired \$38 billion in foreign securities in the first three quarters of the year.

Total	-9,964	17,142	19,611	-26,934	23,645	25,854

* Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

INTRODUCTION: Foreign Currency Positions

The “Treasury Bulletin” reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate “all other” currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$5 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I1 through VI-1 present the currency data reported weekly by major market participants. Tables I2 through VI-2 present more detailed currency data of major market participants, based on monthly Treasury and Federal Financial Institutions Examination Council (FFIEC) 035 reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants and FFIEC reporters that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option’s value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

TABLE ESF-1.—Balances as of March 31, 2003, and June 30, 2003

See footnote on the following page.

TABLE ESF-2.—Income and Expense

[In thousands of dollars. Source: Office of the Assistant Secretary of the Treasury for Management]

	Current quarter Apr. 1, 2003, through June 30, 2003	Fiscal year to date Oct. 1, 2002, through June 30, 2003
Income and expense		
Profit (+) or loss (-) on:		
Foreign exchange	397,713	1,509,523
Adjustment for change in valuation of SDR holdings and allocations ¹	93,175	292,623
Interest (+) or net charges (-) on:		
SDRs	19,834	69,111
U.S. Government securities	28,762	97,151
Foreign exchange	66,618	206,412
Commissions	-	-
Income from operations	606,102	2,174,820
Net income (+) or loss (-)	606,102	2,174,820

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the SDRs based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

Note.— Annual balance sheets for fiscal 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

SPECIAL

REPORTS

TrustFunds

INTRODUCTION: Trust Funds

The tables and charts in this section present the most recent data available on various trust funds administered by the Treasury. Trust funds are moneys held by the Government in accounts established by law or by trust agreement for specific purposes and designated by law as being trust funds.

This report compiles data from many sources and provides information in a consolidated manner.

The Civil Service Retirement and Disability Fund is operated by the Office of Personnel Management. The Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds are under the auspices of the Department of Health and Human Services' Health Care Financing Administration. The Federal Old-age and Survivors Insurance and Federal Disability Insurance Trust Funds are administered by Social Security.

In addition, the Department of Veterans Affairs' Veterans Benefits Administration disburses the National Service Life Insurance Fund. The Department of Labor's Employment and Training Administration is responsible for the Unemployment Trust Fund.

Data for the Railroad Retirement Trust Fund also are included in this section. That trust fund is administered by the Railroad Retirement Board, an independent agency.

The following tables are published in the December issue of the "Treasury Bulletin" each year. Most of the data for the tables came from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government," in which monthly data are published. Estimated figures are based on the "Budget of the United States Government, Fiscal Year 2004," released February 3, 2003.

TABLE TF-15A.—Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as “unfunded authorizations” is the latest estimate received from the DOT for fiscal 2004.

The 24-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury’s Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal 2004.

Highway Account

[In billions of dollars. Source: DOT]

Commitments (unobligated balances plus unpaid obligations, fiscal 2004).....	72.41
less:	
Cash balance (fiscal 2004).....	12.32
Unfunded authorizations (fiscal 2004).....	60.09
24-month revenue estimate (fiscal 2005 and 2006).....	62.59

Mass Transit Account

[In billions of dollars. Source: DOT]

Commitments (unobligated balances plus unpaid obligations, fiscal 2004).....	5.19
less:	
Cash balance (fiscal 2004).....	8.13
Unfunded authorizations (fiscal 2004).....	-2.95
24-month revenue estimate (fiscal 2005 and 2006).....	9.85

Note.—These data do not reflect the fiscal 2004 Department of Transportation Appropriations Bill. These estimates will be updated in the next publication of these tables to reflect enacted appropriation.

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, I, and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Current income bonds (“U.S. Savings Bonds and Notes”)—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of September 2003, the debt limit was \$7,384,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series

issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States; and international and regional organizations, wherever located. Also refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-age and Survivors Insurance Trust Fund; the civil service retirement and

disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, I, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders (“Treasury Financing Operations”)—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Obligations (“Federal Fiscal Operations”)—An unpaid commitment to acquire goods or services.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)—Treasury has historically offered packages of several

“coupon” security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 workdays.

State and local government series (FD -2)—(SLUGs) Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds

from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLUGs are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD -6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue’s interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
