Fiscal 2012 Attributes Used To Prepare Budgetary Reports

USSGL attributes are one component of a data model that describes how detailed data in agencies’ financial systems (for example, USSGL account balances with related attributes captured at the transaction level) relate to external requirements. The data model also shows the relationships between the budget accounts published in the President’s Budget and the Treasury appropriation/fund symbols collected in FACTS II, which are published in the Treasury Annual Report/Appendix. The data model includes:

- FACTS II Attribute Definition Report;
- FACTS II USSGL Account Attributes Table.

FACTS II Attribute Definition Report

This report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity.

FACTS II USSGL Account Attribute Tables

The FACTS II attribute table for fiscal 2012 show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS II reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in FACTS II; these columns contain one of three values:

- Space: This attribute is **not reported** in FACTS II for the USSGL account.
- Y: Yes, report this attribute in FACTS II when this USSGL account is submitted. To determine valid domain values, refer to the “FACTS II - Attribute Definition Report” in this section.

For the latest information, access the FACTS II Web site at [www.fms.treas.gov/factsii/index.html](http://www.fms.treas.gov/factsii/index.html).
